The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Macquarie Global Multi Asset Absolute Return Fund Class I EUR

ISIN: LU1274826673

A sub-fund of Macquarie Fund Solutions, a Société d'Investissement à Capital Variable ("SICAV").

The Management Company of the SICAV is Lemanik Asset Management S.A.

Objectives and Investment Policy

Objective: To provide absolute return over the long term by using primarily an active global asset allocation.

Portfolio securities: The investment strategy of Macquarie Global Multi Asset Absolute Return Fund (the "Sub-Fund") is based on an active global asset allocation (including emerging markets). The Sub-Fund invests globally, predominantly in investment fund units such as exchange traded funds. Furthermore, it may also invest in exchange traded commodities qualifying as eligible transferable securities and have exposure to credit-based securities, equities, cash (in different currencies) and other asset classes. The Sub-Fund may use financial instruments to manage its exposure to various investment risks (hedging) and to seek investment gains.

Investment process: The Investment Manager is actively managing the Sub-Fund and is not constrained by any benchmark. The Investment

Manager combines both quantitative and qualitative asset allocation decisions, thereby intending to hold the portfolio volatility constant over the medium term.

Designed for: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 to 7 years.

Further details of other categories of investments that the Sub-Fund may make are set forth in Annex A of the Prospectus for the Sub-Fund.

You can place orders to buy or sell Sub-Fund shares at any time. Orders received on any given Luxembourg business day before 12 p.m. Luxembourg time will be processed at that day's share price. Income earned by the Sub-Fund is accumulated in the net asset value of this class and not distributed.

Risk and Reward Profile

The risk indicator is based upon historical data and may not be a reliable indication for the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean a "risk free" investment. The Sub-Fund's risk level of 4 results from the following factors:

- The Sub-Fund is well diversified among various asset classes with a focus on liquidity.
- The Sub-Fund has exposure to equities, which typically carry higher risks than bonds or money market instruments.

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than you paid for them. If your currency as an investor is different from the reference currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday

risks and could trigger other risks. The Sub-Fund is subject to the following risks which may not be adequately captured by the indicator:

- The market for investments in emerging market countries may be less developed and it may be difficult for the Sub-Fund to sell its investments in such markets. Investing in emerging markets can be riskier than investing in established markets due to increased volatility and lower trading volume.
- Political, military and natural events may influence the production and trading of commodities and, consequently, have an influence on the commodities related securities and exchange traded commodities in which the Sub-Fund invests. Moreover, terrorism and other criminal activities may have an influence on the availability of commodities and therefore could negatively impact financial instruments in which the Sub-Fund invests which grant exposure to commodities.
- Certain derivatives could increase the Sub-Fund's volatility or expose the Sub-Fund to losses greater than the cost of the derivatives.
- The value of the Sub-Fund's investments may be sensitive to changes in market perceptions of credit quality, both of individual issuers and of the credit markets in general.

For full details of the Sub-Fund's risks, please refer to the Prospectus available as mentioned in section "Risk Considerations".

Charges

One-off charges taken before or after you invest:

Entry charge	-
Exit charge	-

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge	0.69%
----------------	-------

Charges taken from the fund under certain specific conditions:

Performance fee	-
-----------------	---

The charges you pay as an investor are used to pay for the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charges shown are based on expenses as of 31.12.2021. They exclude performance fee, if any, and portfolio transaction costs, except in the case of entry/exit charge paid by the Sub-Fund when buying or selling shares of another fund. This figure may vary.

You may be charged a fee when switching your investment to another sub-fund of the SICAV.

For more information about charges, please refer to sections 7 and 9 of the Prospectus and note "Fees and Expenses" of the most recent audited annual report, available at www.macquarieim.com/investments/products/macquarie-fund-solutions.
