The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Macquarie Global Convertible Fund Class I EUR (Dist.)

ISIN: LU1274833539

A sub-fund of Macquarie Fund Solutions, a Société d'Investissement à Capital Variable ("SICAV").

The Management Company of the SICAV is Lemanik Asset Management S.A.

Objectives and Investment Policy

Objective: To provide a return that captures the potential growth and income of global convertible bonds.

Portfolio Securities: Under normal conditions, the Sub-Fund mainly seeks exposure to global convertible bonds and equivalent hybrid securities. These securities are primarily issued by corporate bodies, governments or other governmental entities in developed markets. The Sub-Fund may also have exposure to other credit-based securities such as high yield credit securities and to cash (in different currencies) and is actively managed. The Sub-Fund may use financial instruments to manage its exposure to various investment risks (hedging) and to seek investment gains. The Sub-Fund will be managed as fully hedged against foreign currency exposure.

Investment process: The Investment Manager is actively managing the Sub-Fund and has all discretion with respect to the composition of the portfolio. The Investment Manager mobilises three skill sets to select and

weighs convertible bonds within the portfolio: sector and country rotation, security selection, and option valuation.

Designed for: This Sub-Fund may not be appropriate for investors who plan to withdraw their money within 5 to 7 years.

Benchmark: Refinitiv Global Focus EUR Hedged Index. The benchmark is a performance reference and the Sub-Fund's underlying portfolio may differ significantly to the benchmark composition.

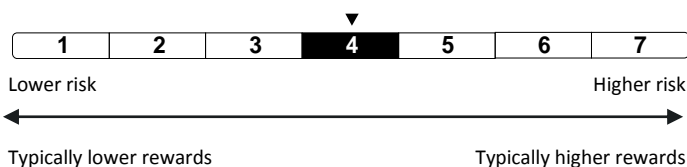

Further details of other categories of investments that the Sub-Fund may make are set forth in Annex A of the Prospectus for the Sub-Fund.

You can place orders to buy or sell Sub-Fund shares at any time. Orders received on any given Luxembourg business day before 12 p.m.

Luxembourg time will be processed at that day's share price.

Any income earned is declared yearly. You may elect to either receive such income in cash or reinvested in the Sub-Fund.

Risk and Reward Profile

The risk indicator is based upon historical data and may not be a reliable indication for the future risk profile of the Sub-Fund. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean a "risk free" investment. The Sub-Fund's risk level of 4 results from the following factors:

- The Sub-Fund's core portfolio consists of convertible bonds with a high degree of diversification.
- The Sub-Fund invests opportunistically in debt instruments with a lower credit quality.

The value of an investment in the Sub-Fund can go up and down. When you sell your shares, they may be worth less than you paid for them. If your currency as an investor is different from the reference currency of the Sub-Fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks. The Sub-Fund is subject to the following risks which may not be adequately captured by the indicator:

- Securities that combine the elements of debt and equity and the risks associated with both, including greater volatility than for straight bond investments with an increased risk of capital loss.
- The market for investments in emerging market countries may be less developed and it may be difficult for the Sub-Fund to sell its investments in such markets. Investing in emerging markets can be riskier than investing in established markets due to increased volatility and lower trading volume.
- Certain derivatives could increase the Sub-Fund's volatility or expose the Sub-Fund to losses greater than the cost of the derivatives.
- Certain securities could become hard to value, or to sell at a desired time and price.

For full details of the Sub-Fund's risks, please refer to the Prospectus available as mentioned in section "Risk Considerations".

Charges

One-off charges taken before or after you invest:

Entry charge	-
Exit charge	-
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	

Charges taken from the fund over a year:

Ongoing charge	1.18%
