

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP Aktiefond Stabil A

ISIN: SE0005224078

SPP Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's objective is to apply a good spread of risk in order to achieve a high risk-adjusted return in the long term with smaller price fluctuations than the global stock markets in which the fund invests, defined as the fund's benchmark index.

Investment strategy: SPP Aktiefond Stabil is a global equity fund that invests in approximately 80-150 companies, which together are expected to provide a stable risk-adjusted performance. In order to select the most attractive companies, a quantitative model is used. The Fund employs model-based management that has a slight preference for shares with high direct yield and aims to have good dispersion between industries and regions.

The fund follows the our standard for sustainable investments. This means that we do not invest in companies which contribute to the violation of human rights, corruption, harming the climate and environment, the production of landmines, cluster munitions, or nuclear weapons, tobacco and other companies in certain individual sectors that are considered unsustainable. In addition, the Fund

also refrain from investing in companies that extract fossil fuels, carbon intensive power companies and companies whose turnover is more than 5 percent from production/distribution from: fossil fuels, weapons/arms, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

Up to 10% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: MSCI World Index, net return.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and Reward Profile

The Risk and Reward Indicator shows the relationship between risk and return for the Fund. A higher position on the scale means the possibility of higher returns, but a greater risk of losing money. The indicator is based on how the Fund's value has changed over the course of the past five years.

This Fund is part of category 5, which means a medium risk of upward and downward fluctuation in the unit value. Category 1 does not constitute a risk-free investment. Over time, the Fund may move both to the right and the left on the scale. This is because the indicator is based on historical data that is not a guarantee of future risk/return.

Equity funds are generally characterised by significant price fluctuations. The Fund invests worldwide. This may entail a lower risk than for funds exposed to a single geographic market.

The indicator mainly reflects the upward and downward fluctuations in the shares that the Fund has invested in. The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: This occurs when a part of the Fund's assets is difficult to sell at a specified time or at a reasonable price.

Currency risk: If the Fund invests in securities in a foreign currency, the value in Swedish kronor is affected when the exchange rate changes. If a foreign currency weakens against the Swedish krona, the value of holdings purchased in that currency in the Fund decreases.

Operational risk: Risk of loss due to things such as system failure, human error or external events.

You can find more information about risks in the Prospectus, which is available from www.sppfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge 0.71 %

Charges taken from the fund under certain specific conditions:

Performance fee None

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: MSCI World Index, net return.

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

Previous years' results are no guarantee of future performance.

Fund launched 2013-10-08.
