

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP Grön Obligationsfond A

ISIN: SE0006763967

SPP Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's objective is to apply a good spread of risk in order to exceed in the long term the return in the interest rate markets in which the fund invests, defined as the fund's benchmark index.

Investment strategy: SPP Grön Obligationsfond is a sustainable, actively managed fixed income fund that invests in what are known as green bonds. Green bonds are defined as bonds and other interest-bearing financial instruments with an explicit sustainability profile, which have a clearly positive impact on the environment and society, and include, for example, green bonds, sustainable bonds, climate bonds and socially responsible bonds. The fund invests primarily in interest-bearing securities issued in Swedish kronor but can also invest in interest-bearing securities in other currencies. Foreign holdings are hedged in Swedish kronor. The fund normally has an average duration of three years, but under certain periods the average duration can be both longer or shorter. The asset manager makes active investment decisions by means of analysis and selection.

The fund follows our standard for sustainable investments, which means, among other things, that we avoid investing in companies that are in breach of international standards and conventions. These include human rights, labour law and international law,

corruption and financial crime, serious climate and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5 per cent of net sales come from the production and/or distribution of tobacco, weapons, alcohol, gambling, pornography or cannabis. The fund excludes the whole of sector 10 Energy (extraction of coal, oil, gas) and companies where 50 per cent of net sales come from the production and/or distribution of fossil fuels in other sectors or companies with large fossil reserves.

Up to 20% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

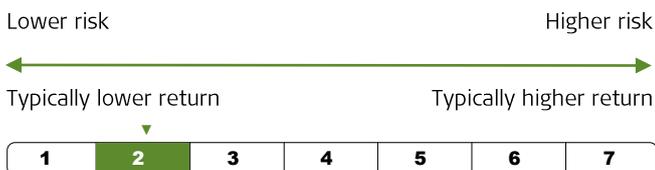

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: OMRX Mortgage Bond All Index.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within two years.

Risk and Reward Profile

The Risk and Reward Indicator shows the relationship between risk and return for the Fund. A higher position on the scale means the possibility of higher returns, but a greater risk of losing money. The indicator is based on how the Fund's value has changed over the course of the past five years.

This Fund is part of category 2, which entails a low risk of upward and downward fluctuation in the unit value. Category 1 does not constitute a risk-free investment. Over time, the Fund may move both to the right and the left on the scale. This is because the indicator is based on historical data that is not a guarantee of future risk/return.

The Fund invests in interest-bearing securities that are generally characterised by a lower risk than the stock market. Based on current interest rates, the duration of the Fund's investments vary between short and long. A longer term implies a higher risk.

The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: This occurs when a part of the Fund's assets is difficult to sell at a specified time or at a reasonable price.

Credit risk: If an issuer cannot pay interest and the nominal amount in time, the bond may lose all or a significant part of its value.

Counterparty risk: Occurs if a counterparty fails to meet its obligations to the Fund, e.g. by not paying an established amount or being unable to provide securities as agreed.

You can find more information about risks in the Prospectus, which is available from www.sppfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge 0,31 %

Charges taken from the fund under certain specific conditions:

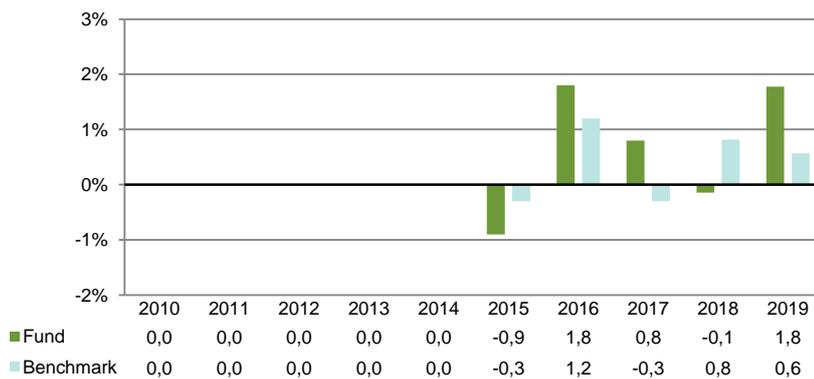

Performance fee None

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: OMRX Mortgage Bond All Index.

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

Previous years' results are no guarantee of future performance.

Fund launched 2015-03-02.
