

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP Global Multifactor Plus A

ISIN: SE0011642958

SPP Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's goal is to achieve a higher return than its benchmark index by investing globally in the developed stock markets.

Investment strategy: SPP Global Multifactor Plus is a sustainable fund that invests globally in shares in approximately 300-400 companies. A systematic management strategy is used with active investment decisions in order to select the most attractive companies. The fund also applies a quantitative model that aims to identify companies based on the factors value, size, momentum and low volatility. The fund strives to be sector- and region-neutral, and the objective is that the factors shall be equally weighted.

The fund follows our standard for sustainable investments, which means, among other things, that we avoid investing in companies that are in breach of international standards and conventions. These include human rights, labour law and international law, corruption and financial crime, serious climate and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5

per cent of net sales come from the production and/or distribution of fossil fuels, tobacco, weapons, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

Up to 10% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund.

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: MSCI World Index, net return.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and Reward Profile

The Risk and Reward Indicator shows the relationship between risk and return for the Fund. A higher position on the scale means the possibility of higher returns, but a greater risk of losing money. The indicator is based on how the Fund's value has changed over the course of the past five years.

This Fund is part of category 5, which means a medium risk of upward and downward fluctuation in the unit value. Category 1 does not constitute a risk-free investment. Over time, the fund can move both left and right on the scale over time. As the fund has existed for less than 5 years, the indicator has been estimated. Historical data is not a guarantee of future risk/return.

Generally speaking, equity funds are characterised by significant fluctuations in prices. The Fund invests worldwide. This may entail a lower risk than for funds exposed to a single geographic market. The indicator mainly reflects the upward and downward fluctuations in the shares that the Fund has invested in. The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: Liquidity risk: This occurs when a part of the Fund's assets is difficult to sell at a specified time or at a reasonable price.

Currency risk: If the Fund invests in securities in foreign currency, the value in Swedish kronor is affected when the exchange rate changes. If a foreign currency weakens against the Swedish krona, the value of holdings purchased in that currency in the Fund decreases.

Operational risk: Risk of loss due to things such as system failure, human error or external events.

You can find more information about risks in the Prospectus, which is available from www.sppfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge None

Exit charge None

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge 0,76 %

Charges taken from the fund under certain specific conditions:

Performance fee None

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. In instances where the Fund is newly established, the expected ongoing charges is used. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: MSCI World Index, net return.

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

Previous years' results are no guarantee of future performance.

Fund launched 2018-10-24.
