Risk and Reward Profile

The above risk indicator shows the correlation between the risk involved in and the reward potential of various investments. The fund's ranking on the indicator is determined by the fluctuations in the net asset value of the fund over the past five years.

The calculation of the ranking is based on the fund's actual return, while a representative return can be used if the fund has not existed for the full calculation period. Large fluctuations result in high risk and a ranking to the right on the risk indicator. Small fluctuations result in lower risk and a ranking to the left on the risk scale. Category 1 does not

The benchmark is used primarily for comparison of performance.

The fund pursues an active investment strategy. Due to the active strategy, the fund's investments may deviate considerably from the benchmark , and your return may be higher as well as lower than the benchmark.

The typical investor in the fund can be expected to have an investment horizon of minimum 5 years.

This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The fund does not pay an annual dividend. Your gain or loss will only be expressed as a change in the fund's market value.

The fund's reward is calculated in euro.

Usually, you may always sell your units at the current price on the days when banks are open.

mean that investments are risk free. The fluctuations of this fund over the past five years rank the fund at category 6.

Please be aware that the ranking on the indicator is calculated on the basis of historical data and may not be a reliable indication of the future risk and reward profile. The ranking may therefore change over time.

Due to financial crises, etc., the securities may no longer be traded. Or they may only be traded to a limited extent, which may have an adverse effect on the reward. We limit this risk by diversifying the investments in the fund on a wide range of securities.

The fund uses derivatives, which are used to either reduce or maintain the fund's overall risk, but are not used to increase the overall risk of the fund.

In the prospectus under " Appendix 5: Risk exposures", you can find a list of the risks affecting the fund's return.

Charges

One-off charges taken before or after you invest:	
Entry charge (%)	3,1 %
Exit charge (%)	0,07 %
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out respectively.	
Charges taken from the fund over a year:	
Ongoing charge (%)	1,74 %
Charges taken from the fund under certain specific conditions:	
Performance fee (%)	No

Entry and exit charges cover the fund's expenses when investors buy and sell fund units. The charges are maximum rates. In some cases, you may pay less. Please contact your financial adviser for further information. We apply the modified single pricing method (Swing Single Pricing). Read more in the Prospectus' section about 'Price method for the settlement of issue and redemption'. The Prospectus is available from the investment association's website www.jyskeinvest.com under 'Downloads'.

The percentage rate for on-going costs is an estimate based on the preceding year's expenses, including costs of the underlying funds. Further details about expenses are available in the investment institution's annual reports for the individual funds. This figure may vary from year to year but will not exceed 2.00% per year. The charges you pay are used to pay the expenses of running the fund, including the expenses of for instance marketing, distribution, management as well as charges for advisory and custodian services. The expenses reduce your potential return. Read more about the fund's costs in the sections "Investment management company and administration costs" as well as "Agreement on investment advisory services and portfolio management" in the prospectus.
