The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested. Performance details provided are in share class currency, include the reinvested dividends gross of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy (USD), while share class returns are shown in the reference currency of share class (EUR). As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.

What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund invests mainly in equity securities of companies located in or doing significant business in the U.S. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Other significant risks include: securities lending risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

Glossary

Estimated 3-5 Yr EPS Growth: An estimated measure of the growth of earnings per share over a forward-looking period. For a portfolio, the value represents a weighted average of the stocks it holds.

Historical 3 Yr Sales Growth: The rate at which sales have increased for the fund's underlying holdings over the last three years.

P/E to Growth: A ratio used to determine a stock's value while taking into account earnings growth. For a portfolio, the value represents a weighted average of the stocks it holds.

Price to Earnings (12-mo Forward): A measure of the price to earnings ratio for a stock using the forecasted earnings for the next 12 months. For a portfolio, the value represents a weighted average of the stocks it holds.

Standard Deviation: A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

Benchmark performance: Benchmarks are used for comparison purposes. The Russell 3000 Growth index is considered to be the main benchmark of the sub-fund as it is made up of growth stocks, which corresponds to the emphasis placed by the manager in the management of the sub-fund. The S&P 500 Index can also be provided as it is considered to be an indicator of the US equity market. Although the manager is not subject to any constraints in the active management of the sub-fund and may invest in companies not included in the benchmarks, the performance of the sub-fund may, from time to time, show close similarities with these benchmarks.

Top Ten Holdings: These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable.

Ongoing Charges: The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Performance attribution is calculated in the base currency of the fund.
