The fund's returns may increase or decrease as a result of changes to foreign exchange rates.

**The value of shares in the Fund and income received from it can go down as well as up, and investors may not get back the full amount invested.** Performance details provided are in share class currency, include the reinvested dividends gross of basic rate UK tax and are net of management fees. Sales charges and other commissions, other taxes and relevant costs to be paid by an investor are not included in the calculations. Performance may also be affected by currency fluctuations. Up to date performance figures can be found on our local website.

When performance for either the portfolio or its benchmark has been converted, different foreign exchange closing rates may be used between the portfolio and its benchmark.

The share class shown has adopted a hedging strategy intended to reduce the effect of exchange rate movements between the currency of the Fund's investment strategy and the currency of the share class. The benchmark returns displayed are shown in the reference currency of the Fund's investment strategy (USD), while share class returns are shown in the reference currency of share class (EUR). As a result, the returns shown above reflect the effect of the hedging strategy and one can compare the returns of the Fund (net of fees) relative to its benchmark index without the impact of exchange rate movements on index returns.

## What Are the Key Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. The Fund invests mainly in REITs and other equity securities of the real estate sector. Such REITs and securities have historically been subject to significant price movements that may occur suddenly due to market or real estate-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. The Fund may distribute income gross of expenses. Whilst this might allow more income to be distributed, it may also have the effect of reducing capital. Other significant risks include: foreign currency risk, liquidity risk, derivative instruments risk. For full details of all of the risks applicable to this Fund, please refer to the "Risk Considerations" section of the Fund in the current prospectus of Franklin Templeton Investment Funds.

## Glossary

**Price to Book:** The price per share of a stock divided by its book value (i.e., net worth) per share. For a portfolio, the value represents a weighted average of the stocks it holds.

**Price to Cash Flow:** Supplements price/earnings ratio as a measure of relative value for a stock. For a portfolio, the value represents a weighted average of the stocks it holds.

**Price to Earnings (12-mo Trailing):** The share price of a stock, divided by its per-share earnings over the past year. For a portfolio, the value represents a weighted average of the stocks it holds.

**Standard Deviation:** A measure of the degree to which a fund's return varies from the average of its previous returns. The larger the standard deviation, the greater the likelihood (and risk) that a fund's performance will fluctuate from the average return.

The risks associated with a Global REIT strategy include various risks inherent in the ownership of real estate property, such as fluctuations in lease occupancy rates and operating expenses, variations in rental schedules, which in turn may be adversely affected by general and local economic conditions, the supply and demand for real properties, zoning laws, rent control laws, real property tax rates, the availability and costs of financing, environmental laws, and uninsured losses (generally from catastrophic events such as earthquakes, floods, and wars).

Investments in derivative instruments entail specific risks that may increase the risk profile of the fund and are more fully described in the Fund's prospectus.

The Fund invests in a specific sector or geographical area and the returns may be more volatile than a more diversified fund.

**Fund Overview: The Historic Yield** reflects distributions declared over the past 12 months as a percentage of the mid-market unit price of the fund as at the date shown. It does not include any preliminary charge and investors may be subject to tax on distributions.

**Fund Management:** CFA® and Chartered Financial Analyst® are trademarks owned by CFA Institute.

**Top Ten Holdings:** These securities do not represent all of the securities purchased, sold or recommended for clients, and the reader should not assume that investment in the securities listed was or will be profitable.

**Ongoing Charges:** The Ongoing Charges Figure (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Performance attribution is calculated in the base currency of the fund.
