What is this product?

Type: Shares of a Sub-Fund of MULTI UNITS LUXEMBOURG, a SICAV.

Term: The term of the Sub-Fund is unlimited. The Management Company may terminate the fund by liquidation or merger with another fund in accordance with legal requirements.

Objectives: The Fund is an index-tracking UCITS passively managed. The investment objective of the Fund is to track both the upward and the downward evolution of the S&P 500 Net Zero 2050 Paris-Aligned ESG Net Total Return Index (the Benchmark Index) denominated in USD, while minimizing the volatility of the difference between the return of the Fund and the return of the Benchmark Index (the "Tracking Error"). The anticipated level of Tracking Error in normal market conditions is indicated in the prospectus.

The Benchmark Index is representative of the performance of eligible equity securities from the S&P 500 Index (the "Parent Index") selected and weighted to be collectively compatible with a 1.5°C global warming scenario. The weighting strategy aims to minimize through optimization the difference in constituent weights to the Parent Index while simultaneously delivering a broad range of climate objectives covering transition risk (for instance a minimum self-decarbonization rate of greenhouse gas emissions intensity equating to at least 7% on average per annum), climate change opportunities (through substantially higher green-to-brown revenue share) and physical risk (through a reduced exposure to physical risks from climate change using Trucost's Physical Risk dataset as defined in the methodology of the Benchmark Index). The Benchmark Index aims to meet and maintain the criteria set out by the European Union's Technical Expert Group on Climate Benchmark's ESG Disclosures, to qualify as an EU Paris-Aligned Benchmark ("EU PAB").

The Fund follows an extra-financial approach significantly engaging that permits the reduction of overall greenhouse gas emissions intensity compared to the Parent Index by at least 50%. For further information in relation to the general and specific environmental, social and governance (ESG) objectives targeted by the Fund, please refer to the Transparency Code of the Fund available on <https://www.lyxoretf.com/>. Limits of the methodology of the Benchmark Index are described in the prospectus of the Fund through risk factors, such as the EU PAB label withdrawal or risk related to the carbon data used in the methodology of the Benchmark Index.

The analysis of companies' current and future greenhouse gas emission is partly based on declarative data, models and estimates. In the current state of the available data, all greenhouse gas emission data are not available, and some are model based (in particular those related to scope 3 which

includes all greenhouse gas emissions that are not directly related to manufacturing of a product). The methodology of the Benchmark Index does not prevent to incorporate highly greenhouse gas emitting companies' securities.

S&P's website (<https://us.spindices.com/>) contains more detailed information about the S&P indexes.

The Benchmark Index is a net total return index. A net total return index calculates the performance of the Benchmark Index constituents on the basis that any dividends or distributions are included in the Benchmark Index returns after withholding tax retention.

The Fund seeks to achieve its objective via a direct replication, by investing primarily in the securities comprising the Benchmark Index. To optimize the Benchmark Index replication, the Fund may use a sampling replication strategy.

The potential use of this technique is published on Lyxor's website: www.lyxoretf.com.

Updated composition of the Fund holdings is available on www.lyxoretf.com.

In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the Fund, and might also be mentioned on the websites of the stock exchanges where the Fund is listed.

Intended Retail Investor: This product is intended for investors, with a basic knowledge of and no or limited experience of investing in funds seeking to increase the value of their investment over the recommended holding period and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the MULTI UNITS LUXEMBOURG prospectus.

Distribution policy: As this is a non-distributing share class, investment income is reinvested. the accumulation share automatically retains, and re-invests, all attributable income within the Sub-Fund; thereby accumulating value in the price of the accumulation shares.

More Information: You may get further information about the Sub-Fund, including the prospectus, and financial reports which are available at and free of charge on request from: Amundi Asset Management at 91-93 boulevard Pasteur, 75015 Paris, France.

The Net Asset Value of the Sub-Fund is available on www.amundi.lu.

Depository: Societe Generale Luxembourg.

What are the risks and what could I get in return?

RISK INDICATOR

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Please refer to the MULTI UNITS LUXEMBOURG prospectus.

What happens if Amundi Asset Management is unable to pay out?

A separate pool of assets is invested and maintained for each Sub-Fund of MULTI UNITS LUXEMBOURG. The assets and liabilities of the Sub-Fund are segregated from those of other sub-funds as well as from those of the Management Company, and there is no cross-liability among any of them. The Sub-Fund would not be liable if the Management Company or any delegated service provider were to fail or default.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.
