Wellington Management Funds (Luxembourg)

General information to Unitholders

Structure of Wellington Management Funds (Luxembourg) (the “Umbrella Fund”)

The Umbrella Fund is an open-ended investment fund organised initially under Part I of the Luxembourg Law of March 30, 1988 as an unincorporated mutual investment fund (fonds commun de placement) and is authorised under Part I of the Luxembourg Law of December 17, 2010, as amended (the “2010 Law”).

The Umbrella Fund is managed by Wellington Luxembourg S.à r.l. (the “Management Company”), an entity which was incorporated under the laws of Luxembourg on August 30, 1991 under the form of a société en commandite par actions (S.C.A.), which was then converted to a société anonyme (S.A.) on October 31, 2006 and subsequently converted into a société à responsabilité limitée (S.à r.l.) on December 5, 2014. Wellington Luxembourg S.à r.l. acts as the Management Company of the Umbrella Fund, pursuant to Management Regulations approved by the Management Company (the “Management Regulations”).

The Umbrella Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) under Article 1(2) of the UCITS Directive (the “Directive”), and may therefore be offered for sale in European Union (“EU”) Member States (subject to registration in countries other than Luxembourg). In addition, applications to register the Umbrella Fund may be made in other countries.

As at June 30, 2023, the Umbrella Fund consisted of the following funded funds (the “Funds”):

- Wellington Asia Technology Fund (SFDR Article 8)
- Wellington Asian Opportunities Fund (SFDR Article 8)
- Wellington Climate Strategy Fund (SFDR Article 9)
- Wellington Downside Alpha Opportunities Fund (SFDR article 6)
- Wellington Emerging Markets Research Equity Fund (SFDR article 6)
- Wellington Global Innovation Fund (SFDR Article 8)
- Wellington Global Opportunities Equity Fund (SFDR Article 8)
- Wellington Global Quality Growth Fund (SFDR Article 8)
- Wellington Global Research Equity Fund (SFDR Article 8)
- Wellington Global Select Capital Appreciation Equity Fund (SFDR Article 8)
- Wellington US Research Equity Fund (SFDR Article 8)
- Wellington Global Total Return Fund (UCITS) (SFDR Article 8)
- Wellington Opportunistic Emerging Market Debt II Fund (SFDR Article 8)

The Management Regulations

The Management Regulations for the Umbrella Fund were stipulated by the Management Company on April 15, 1994. The Management Regulations were published in the Mémorial of May 17, 1994 and were deposited with the Register of the Tribunal d’Arrondissement of Luxembourg on April 19, 1994. These Management Regulations have been amended several times, most recently in November 2022.

For all Unitholders

The Management Regulations, the Prospectus, the Key Investor Documents (“KID”), the unaudited semi-annual reports, audited annual reports along with information concerning issue and repurchase prices, the statement of changes in the composition of the investment portfolio and the financial situation of the Umbrella Fund can be requested directly from Wellington Luxembourg S.à r.l. at the registered office of the Management Company of the Umbrella Fund or by telephoning (352)-464010-1.

Financial information concerning the Umbrella Fund shall be available at the registered office of the Management Company and from State Street Bank International GmbH, Luxembourg Branch every bank working day in Luxembourg.

Notices to Unitholders

All notices to Unitholders shall be sent, in accordance with the instructions held on the account, to the Unitholders at the address inscribed in the register of Unitholders. In addition, the Management Company may decide to inform the Unitholders by other means.

Wellington Management Funds (Luxembourg)

General information to Unitholders (continued)

For Swiss investors

BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, CH-8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent of the Umbrella Fund. The Management Regulations, the Prospectus, the KIDs, the unaudited semi-annual reports, the audited annual reports and the statement of changes in the composition of the investment portfolio can be obtained free of charge from BNP PARIBAS.

The Management Company or the Umbrella Fund and its agent may pay retrocessions as remuneration for distribution activity in respect of Funds units in or from Switzerland. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge. In respect of the units distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland. Retrocessions are included in Total Expense Ratio ("TER"). TER have been calculated in accordance with the requirements of Asset Management Association Switzerland ("AMAS") guidelines.

Specific information for investors in the Federal Republic of Germany

Facilities according to Art. 92(1) a) of the Directive 2009/65/EC (as amended by the Directive (EU) 2019/1160) are available from:

State Street Bank International GmbH, Luxembourg Branch
49, Avenue J.F. Kennedy
L - 1855 Luxembourg
Grand Duchy of Luxembourg
Email: WellingtonGlobalTA@statestreet.com

State Street Bank International GmbH, Luxembourg Branch is responsible for processing subscription, repurchase and redemption orders and making payments to unit-holders.

The following facilities according to Art. 92(1) b) to e) of the Directive 2009/65/EC (as amended by the Directive (EU) 2019/1160) are available from www.eifs.lu/wellingtonmanagementfunds:

- information on how orders (subscription, repurchase and redemption) can be made and how repurchase and redemption proceeds are paid;
- information and access to procedures and arrangements related to investors' rights and complaints handling;
- information in relation to the tasks performed by the facilities in a durable medium;
- the latest sales prospectus, the articles of association, the annual and semi-annual reports, as well as the key investor documents.

The issue, redemption as well as all conversion prices are published on fundinfo.com.

Any notices to the Unitholders will be sent to the Unitholders in Germany via letter or e-mail as requested by the Unitholder in their account opening agreement. According to § 298 (2) of the Investment Code (KAGB), the notices to the Unitholders will additionally be published in Germany in the Federal Gazette (www.bundesanzeiger.de) in the following cases:

- suspension of the redemptions of the units,
- termination of the management of the Fund or its liquidation,
- any amendments to the Articles of Association which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the Umbrella Fund with one or more other Funds and,
- the change of the Umbrella Fund into a Feeder Fund or the modification of a Master Fund.

For United Kingdom investors

The attention of Unitholders subject to UK income tax is drawn to the anti-avoidance provisions of Section 714 of the Income Taxes Act 2007. These provisions deal with the transfer of assets outside the UK which may render certain resident persons liable to income tax in respect of undistributed income profits of the Umbrella Fund on an annual basis. However as the Umbrella Fund is transparent for income tax purposes and those same UK resident individuals would be taxable in any case these provisions should not be in point. The legislation is not directed towards the taxation of capital gains.

Wellington Management Funds (Luxembourg)

Report of the Management Company

June 30, 2023

The Management Company hereby presents the unaudited semi-annual report of the Umbrella Fund covering the period from January 01, 2023 to June 30, 2023.

State Street Bank International GmbH, Luxembourg Branch serves as a Depositary, Administrator, Registrar and Transfer Agent and Paying Agent of the Umbrella Fund.

Corporate governance and ALFI (the Association of the Luxembourg Fund Industry)

Code of conduct

The preparation of the financial statements of the Umbrella Fund is carried out by State Street Bank International GmbH, Luxembourg Branch, as Administrator under the supervision of the Board of Managers of the Management Company (the "Managers"). In accordance with the Luxembourg laws and regulations, the Management Company has put procedures in place to ensure that appropriate internal controls relevant to accounting records, including the preparation and fair presentation of the financial statements, are in place at the Management Company and its services providers, and otherwise to exercise oversight with respect to accounting estimates or judgments made in connection with the preparation of the financial statements. The Managers are satisfied that they have fully complied with these requirements.

The Managers are responsible for ensuring that a high level of corporate governance is met and consider that the Umbrella Fund has complied with the best practices in the Luxembourg funds industry.

In particular, the Managers have adopted the ALFI Code of Conduct (the "Code") which sets out principles of good governance.

The Managers meet at least five times a year and ensure that the Management Company maintains high standards of integrity and control in the Umbrella Fund's operations and that it possesses adequate governance and means of control as Luxembourg laws and regulation demand.

The Managers consider that the Umbrella Fund has complied with the principles of the Code in all material aspects throughout the financial period ended June 30, 2023. The Managers undertake an annual review of ongoing compliance with the principles of the Code.

The invasion of Ukraine by Russia

The invasion of Ukraine by Russia which began on February 24, 2022 has increased valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a lesser extent, most global markets. As of the date of this report the resolution of this event, and the full potential impact on the Funds, continues to be uncertain. Management continues to monitor developments that may impact financial markets including sanctions, currency repatriation restrictions, debt forgiveness or defaults, and any other actions by governments and developments of the crisis. Management will further assess the impact on the Funds' portfolio operations and valuation and will take any potential actions needed, as facts and circumstances are subject to change and may be specific to investment strategies and jurisdictions. Please refer to the country concentration table presented for of each of the Funds in these financial statements to assess the exposure of the net assets to securities issued by companies in Russia, Ukraine or Belarus as of June 30, 2023.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country Asia Pacific Technology Custom Sector Index (the "Index"), primarily through investing in the equity securities of technology and technology related companies listed or operating in the Asia region.

The Investment Manager will actively manage the Fund, using bottom up, company specific analysis to invest in publicly traded securities of companies domiciled in the Asia region that the Investment Manager believes will benefit from the region's growing importance in the technology sector. These include securities of companies involved in the design and/or manufacture of semiconductors, semiconductor equipment, electronics, software and technology services, as well as technology related companies in other sectors.

The evaluation of Sustainability Risks through the analysis of environmental, social and governance ("ESG") factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times we seek to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison and market context purposes only.

Wellington Management Funds (Luxembourg)

Wellington Asia Technology Fund (continued)

Investment Manager's report (continued)

June 30, 2023

Investment Objective & Policy (continued)

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Asia Technology Fund launched on March 14, 2018 with D USD, N USD and S USD classes. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)				Since Inception	Inception Date
	Periods ended June 30, 2023

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country Asia Ex Japan Index (the "Index") primarily through investment in companies listed or operating in the Asia ex Japan region.

The Investment Manager will actively manage the Fund, taking an unconstrained approach which invests in companies across the capitalisation spectrum in developed and emerging markets in the Asia ex Japan region, focusing on the identification of undervalued high-quality businesses.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times we seek to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest primarily in equity securities of companies with market caps in excess of USD500 million, including common stocks, depository receipts (such as ADRs, GDRs and European Depositary Receipts), shares in REITs constituted as Closed End Funds, similar liquid equity equivalents, and equity derivatives such as futures and options, which may be used for investment purposes and for efficient portfolio management including hedging against risk.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

Wellington Management Funds (Luxembourg)

Wellington Asian Opportunities Fund (continued)

Investment Manager's report (continued)

June 30, 2023

Investment Objective & Policy (continued)

The Fund may also invest in other securities including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law, and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. Cash holdings are generally limited to 10%.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Asian Opportunities Fund launched on December 20, 2010 with an S USD class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)				Since Inception*	Inception Date

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 9 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index") while contributing to the environmental objective of climate risk mitigation (addressing the causes and minimising the possible impacts of climate change) and adaptation (aiming to reduce the negative effects of climate change or helping communities adapt to the impact of climate change), primarily through investment in equity securities issued by companies worldwide.

The Fund will invest at least 90% of net asset value in shares of companies whose products or services meet the Investment Manager's climate stewardship criteria around mitigation and adaptation. In order to be included in the portfolio, more than 50% of a company's revenues must be tied to mitigation and/or adaptation activities. Impact measurement and management are core to the Investment Manager's strategy so key performance indicators (KPIs) are used to quantify a company's climate stewardship. These KPIs include (but are not limited to): net CO₂ avoided (for example, how a product such as a smart meter can improve emissions over its lifetime), amount of renewable energy produced and amount of water treated. Given the focus on climate mitigation and adaptation, the Fund will not invest in major fossil fuel and coal companies, applying a screen to exclude the top 100 natural gas, thermal coal and oil companies respectively based on reserves.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- Given the Investment Manager is investing in companies where climate mitigation or adaptation is material to the company's business, the Fund demonstrates a bias towards small and mid-cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.
- The Investment Manager invests in companies solving for climate mitigation or adaptation challenges; therefore, the Fund can demonstrate strong sector biases, specifically towards the utilities and industrials sectors. As a result, of these sector biases, it is possible that the Fund will have a higher carbon footprint (based on scope 1 and scope 2 carbon emissions) than the Index, which is used for performance measurement and market context only. The Investment Manager places a greater focus on understanding and quantifying the net carbon emissions that are avoided over the lifetime of the company's product or service.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuer within regional and sector peer groups.

Further details on the sustainability risks considered and their potential impacts as well as pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund are described in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison and market context purposes only.

Wellington Management Funds (Luxembourg)

Wellington Climate Strategy Fund (continued)

Investment Manager's report (continued)

June 30, 2023

Investment Objective & Policy (continued)

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Climate Strategy Fund launched on November 7, 2018 with D USD, N USD and S USD classes. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)

Wellington Management Funds (Luxembourg)

Wellington Downside Alpha Opportunities Fund

Investment Manager's report

June 30, 2023

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index") primarily through investment in equity securities issued by companies worldwide.

The Index may be considered during portfolio construction and is used for performance comparison purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline.

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments including swaps, futures, options, forwards and other UCITS-eligible derivatives, for investment purposes and for efficient portfolio management including hedging against risk. Where the Fund uses total return swaps, the underlying will consist of instruments in which the Fund may invest according to its investment objective and policy.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The full investment objective and policies are defined in the Fund's Prospectus.

Wellington Management Funds (Luxembourg)

Wellington Emerging Markets Research Equity Fund

Investment Manager's report

June 30, 2023

Investment Objective & Policy

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI Emerging Markets Index (the "Index") primarily through investing, either directly or indirectly, in equity and equity-related securities issued by companies located in emerging market countries and/or conduct substantial business activities in emerging market countries.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Index is integral to portfolio construction and is used for performance comparison purposes.

The Fund, over time, will be diversified by issuer relative to the global emerging equity market and will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics, including country exposure, will reflect the nature of the underlying stock selections.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest in China A Shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

Whilst the Fund does not promote any specific ESG characteristics or have sustainable investment objective, the evaluation of Sustainability Risks through the analysis of ESG factors is a part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

As the Fund is typically Index aligned by industry and will be broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Emerging Markets Research Equity Fund launched on June 3, 2014 with an S USD class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2023

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term capital appreciation in excess of the MSCI All Country World Index (the "Index"), primarily through investment in equity securities issued by companies worldwide, including emerging markets.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- **Data Privacy:** Where the Investment Manager invests in companies in the technology sector, social considerations are critical when evaluating companies with access to large customer data sets, particularly in relation to the company's transparency around the type of data collected, the manner in which it is used, and the circumstances under which it might be shared. Consumer perceptions that a company's products or services do not protect personal information could inhibit sales and may impact the value of an investment.
- **Governance:** Where the Investment Manager invests in newly listed companies, there is a general lack of public information and disclosure in comparison to larger cap companies. In the investment universe in which the Investment Manager looks for innovative companies, there is typically also higher insider ownership. Founder's control over the company is often seen as an issue from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's vision is often key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. Whilst assessing Sustainability Risks is part of the Fund's investment process, there are some exceptions where these might not be relevant or less relevant, where the companies have recently gone public. Newly listed companies do not typically have substantial data points, nor typically possess the resources to quantify the exact impact pertaining to each element of their supply chains. In many cases, even if sustainability is central to their own internal structures, these companies may struggle to demonstrate their credentials at securing continued investment in the changing environment hence tend to get poor external ESG ratings. However, the Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

Further details on the sustainability risks considered and their potential impacts as well as pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund are described in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison, weighted average carbon intensity and market context purposes only.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest in China A Shares traded via Stock Connect.

Wellington Management Funds (Luxembourg)

Wellington Global Innovation Fund (continued)

Investment Manager's report (continued)

June 30, 2023

Investment Objective & Policy (continued)

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund invests in an unconstrained manner and may at times be concentrated by geographical region or industry sector.

The Fund is denominated in US Dollars but may have exposure to various currencies and is not normally be hedged against currency fluctuations, however the Investment Manager may employ currency hedging to seek to protect or enhance the value of the Fund's holdings when it believes it is advisable to do so.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Global Innovation Fund launched on February 16, 2017 with D USD, N USD and S USD classes. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date
	Periods ended June 30, 2023

Wellington Management Funds (Luxembourg)

Wellington Global Opportunities Equity Fund

Investment Manager's report

June 30, 2023

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI All Country World Index (the "Index"), seeking to achieve the objective by principally investing in equity securities issued by companies worldwide.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund are described in the Fund's Prospectus.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Index may be considered during portfolio construction and is used for performance comparison purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund will invest, either directly or indirectly, in equity and other securities with equity characteristics, including, for example, shares, preferred stock, warrants, dividend-right certificates, shares of REITs constituted as Closed End Funds and depositary receipts issued by companies worldwide.

The Fund may also invest in other securities, including, for example, convertible bonds, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law, and debt securities (not exceeding 20% of the net assets of the Fund), cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), and derivatives for investment purposes and for efficient portfolio management including hedging against risk, all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest in China A Shares traded via Stock Connect.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Global Opportunities Equity Fund launched on February 12, 2010 with a T JPY class. The final published net asset values per unit class for particular class was: T JPY ¥36,145.5282. The table below details the performance of all funded classes within the Fund.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns, in excess of the MSCI All Country World Index (the "Index"), primarily through investment in equity and equity-related securities of companies worldwide.

The Investment Manager aims to identify market-leading companies with growing industry market share, positive long-term earnings estimate revisions and operating efficiency.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Index may be considered during portfolio construction and is used for performance comparison and weighted average carbon intensity purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund may invest in common stock and depositary receipts, real estate securities, preferred stock, rights, warrants, exchange-traded funds ("ETFs"), as well as debt securities, including convertible bonds, cash and cash equivalents and derivative instruments issued by companies worldwide. No more than 5% of Net Asset Value of the Fund will be invested in non-listed and non-traded collective investment schemes.

For investment purposes and for efficient portfolio management, including hedging against risk, the Fund may invest in ETFs and derivative instruments, including, but not limited to, forward contracts, futures contracts, options contracts and swaps. In addition, in order to gain efficient investment exposure to issuers in certain countries or geographic regions, the Fund may invest in market-access products. The Fund may invest in China A Shares traded via Stock Connect.

The Fund is denominated in US Dollars and normally is not hedged against currency fluctuations, although currency hedging may be employed to seek to protect or enhance investments at the discretion of the Investment Manager.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the MSCI World Index (the "Index"), by primarily investing in equity securities issued by companies worldwide, with a maximum of 50% of the weighted average carbon intensity of the Index.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of GIAs) and external research (such as company meetings) to assess any potential impact of Sustainability Risks on the value of the assets over the time horizon of the Fund.

The GIAs managing the portfolio explore ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), and as part of the security selection decisions made within the investment process. GIAs are dedicated to an industry or closely related industries, which allows them to meet and engage with company management teams over extended periods of time as part of their fundamentally driven research process, and we believe this enables them to better evaluate industry specific ESG factors and their impact on companies. GIAs incorporate Sustainability Risks into their assessment of a company's outlook, looking to avoid investments where the likelihood of a Sustainability Risk event is underrepresented in the price of the security. GIAs may also seek to mitigate Sustainability Risk through actively engaging with companies to support corporate behaviour and actions that benefit the Fund. The GIAs also consult the Investment Manager's ESG analysts for insight on material ESG Factors of differentiation between companies within regional and sector peer groups.

As the Fund is typically Index aligned by industry (except for the energy sector, due to the exclusion of companies principally involved in fossil fuel extraction/production related activity) and will be broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the sustainability risks considered and their potential impacts as well as pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund are described in the Fund's Prospectus.

The Index is integral to portfolio construction and is used for performance comparison and weighted average carbon intensity purposes.

The Fund, over time, will be diversified by issuer relative to the global equity market and will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics, including country exposure, will reflect the nature of the underlying stock selections. Turnover is expected to be moderate to high.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents (to achieve its investment goals, for treasury purposes, and/or in case of unfavourable market conditions), all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the net asset value of the Fund will be invested in non-listed and non-traded collective investment schemes. The Fund may invest up to 10% of net asset value in China A Shares traded via Stock Connect.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term capital appreciation in excess of the MSCI World Index (the "Index"), primarily investing in equity securities issued by companies worldwide that the Investment Manager believes have significant capital appreciation potential.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Index serves as a reference benchmark for performance comparison purposes and weighted average carbon intensity purposes. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index.

The Fund will invest, either directly or indirectly, in equity and other securities with equity characteristics, including, for example, shares, preferred stock, warrants, dividend right certificates, shares of REITs constituted as Closed End Funds and depositary receipts, issued by companies worldwide.

The Fund may also invest in other securities, including, for example, convertible bonds, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law, and debt securities (not exceeding 20% of the net assets of the Wellington Global Select Capital Appreciation Equity Fund), cash and cash equivalents, and derivative instruments for investment purposes and for efficient portfolio management, including hedging against risk, all as deemed by the Investment Manager to be consistent with the investment discipline. The Fund may invest up to 10% of net asset value in China A Shares traded via Stock Connect.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of FDIs is limited to 100% of Net Asset Value of the Fund when calculated using the commitment methodology.

The full investment objective and policies are defined in the Fund's Prospectus.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the S&P 500 Net Index (the "Index"), primarily through investment in equity securities issued by companies incorporated or exercising a predominant part of their economic activities in the US, with a maximum of 50% of the weighted average carbon intensity of the Index. The Fund may also invest up to 10% of the Fund's assets in non-US companies.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact of Sustainability Risks on the value of the assets over the time horizon of the Fund.

The GIAs managing the portfolio consider ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), and part of the security selection decisions made within the investment process. GIAs are dedicated to an industry or closely related industries, which allows them to meet and engage with company management teams over extended periods of time as part of their fundamentally driven research process, and we believe this enables them to better evaluate industry specific ESG factors and their impact on companies. GIAs incorporate ESG factors into their assessment of a company's outlook, looking to avoid investments where the likelihood of a Sustainability Risk event is underrepresented in the price of the security. GIAs may also seek to mitigate Sustainability Risk through actively engaging with companies to support corporate behaviour and actions that benefit the Fund. The GIAs also consult the Investment Manager's ESG analysts for insight on material ESG factors of differentiation between companies within sector peer groups.

As the Fund is typically Index aligned by industry (except for the energy sector, due to the exclusion of companies principally involved in fossil fuel extraction/production related activity) and will be broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the sustainability risks considered and their potential impacts as well as pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund are described in the Fund's Prospectus.

The Index is integral to portfolio construction and is used for performance comparison and weighted average carbon intensity purposes and is used to calculate the performance fee as disclosed in the relevant performance fee section. The Fund's securities will generally be components of the Index but are expected to have different weightings. This Index does not take into account the ESG characteristics promoted by the Fund, which are intended to be achieved by the investment process followed by the Investment Manager.

The Fund, over time, will be diversified by issuer relative to the US equity market and will not be oriented towards any particular investment style (e.g. growth, value, small companies); its characteristics will reflect the nature of the underlying stock selections. Turnover is expected to be moderate to high.

The Fund will primarily invest, directly or indirectly through the use of FDIs, in equity and other securities with equity characteristics.

The Fund may also invest in other securities, including, for example, exchange-traded funds qualifying as UCIs within the meaning of the 2010 Law and cash and cash equivalents, all as deemed by the Investment Manager to be consistent with the investment discipline. No more than 5% of the Net Asset Value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs including swaps, futures, options, forwards and other UCITS-eligible FDIs, for investment purposes and for efficient portfolio management, including hedging against risk. Where the Fund uses total return swaps, the underlying consists of instruments in which the Fund may invest according to its investment objective and policy.

The Fund is denominated in US Dollars.

The global exposure for this Fund is calculated according to the commitment methodology. The global exposure generated through the use of financial derivative instruments is limited to 100% of net asset value of the Fund when calculated using the commitment methodology.

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek absolute returns above a cash benchmark over the medium to long term, primarily through investing, either directly or indirectly, in a range of fixed income asset classes.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the securities over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
- Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the sustainability risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Fund is not constructed relative to a benchmark, the ICE Bank of America 3-Month T-Bill Index (the "Index") will serve as the cash benchmark for performance comparison purposes and is used to calculate the performance fee as disclosed in the relevant performance fee section.

The Fund will invest primarily in debt instruments issued by government, agency, and supranational issuers; mortgage-, commercial mortgage-, and asset-backed securities; corporate and REITs (constituted as Closed End Funds) debt; credit-linked, index-linked, convertible and capital securities; as well as other debt securities, both fixed- and floating-rate, including forward contracts on such securities. These debt obligations may be denominated in US Dollars or other currencies. Further these debt obligations may include investments in contingent capital and contingent convertible securities ("CoCos" as defined in the Glossary) but any such exposures will not exceed 10% of the Net Asset Value of the Fund. The Fund may hold equity securities, where they are the result of a corporate action or debt restructuring. The Fund may also hold cash and cash equivalents in multiple currencies without restriction. Repurchase, reverse repurchase, and dollar roll transactions are permitted. The Fund may also hold private placements, including those issued pursuant to Rule 144A and/or Regulation S securities (Rule 144A and Regulation S securities are those offered without registration under the United States Securities Act of 1933 (as amended)), and other restricted securities which contain commitments to register to trade publicly within 12 months or the liquidity of which is deemed appropriate by the Investment Manager. The Fund will not invest in the securities of any issuers involved in the production of tobacco.

Wellington Management Funds (Luxembourg)

Wellington Global Total Return Fund (UCITS) (continued)

Investment Manager's report (continued)

June 30, 2023

Investment Objective & Policy (continued)

The Fund may buy and sell exchange-traded and over-the-counter derivative instruments, including interest rate, credit, index, and currency futures; currency, interest rate, total rate of return, and credit default swaps; currency, bond, and swap options; deliverable and non-deliverable currency forward contracts; warrants; "to-be announced" ("TBA") securities qualifying as Transferable Securities in compliance with Luxembourg law; and other derivative instruments, and may hold outright short positions via derivative instruments for hedging purposes and otherwise in pursuit of the Fund's investment objective.

The approach uses a wide range of FDIs to implement active positions and for hedging purposes. Primary derivative instruments employed to express interest rate and credit strategies include bond futures, bond forwards, interest rates swaps and credit default swaps. Primary derivative instruments employed to express currency strategies include currency forwards and options.

The Fund is denominated in US Dollars.

An absolute VaR approach is applied to monitor and measure global exposure. The Fund's VaR is limited to 20% of the Fund's Net Asset Value.

On average the expected leverage will generally be around 2000% of Net Asset Value through the use of FDIs, but may be above this on an exceptional basis in particular due to high numbers of offsetting positions or temporary investments in short term interest rates via derivatives. In order to be consistent with current regulatory guidance on leverage disclosure, leverage is calculated as the sum of all the notionals of all FDIs. This calculation includes the notional exposure associated with FDIs but does not include the underlying investments of the Fund which make up 100% of total net assets. Where FDIs are used for hedging purposes or are themselves hedged against equal and opposite trades, the sum of gross notional values of FDIs may not reflect the true economic risk of the Fund. Due to the high leverage of this Fund, unitholders should also refer to the relevant risk warnings in the sections "Risk Factors" and "All Funds". Further information on leverage and its calculation can be found in the section of the Prospectus entitled Leverage.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Global Total Return Fund (UCITS) launched on May 31, 2011. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					Inception Date

Investment Objective & Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The investment objective of the Fund is to seek long-term total returns in excess of the JP Morgan Emerging Markets Bond Index Global ex CCC (the "Index"), primarily through investment in a diversified portfolio of emerging markets debt securities and currency instruments.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company and country engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry and credit analysts) and external research (such as company and policymakers meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
- Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
- Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is described in the Fund's Prospectus.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Index may be considered during portfolio construction and is used for performance comparison purposes. Fund securities may be components of the Index but are not expected to have similar weightings.

The Fund will invest either directly or indirectly through FDIs; FDIs will primarily provide exposure to emerging markets, fixed income securities and currencies, and may be used for both investment purposes and for efficient portfolio management including hedging against risk.

A relative VaR approach is applied to monitor and measure the global exposure. The Fund's VaR is limited by twice the VaR of a reference portfolio, being the Index.

The use of financial derivative instruments will result in the creation of leverage. The level of leverage (calculated as the sum of all the gross notional of all FDIs but not including the underlying investments of the Fund which make up 100% of total net assets) is not expected to be in excess of 200% of the Net Asset Value under normal circumstances (largely due to the use of forward contracts for currency hedging purposes), but investors should note the possibility of higher levels of leverage in certain circumstances. In order to be consistent with current regulatory guidance on leverage disclosure, these figures are calculated using the sum of the gross notional of each FDIs. Where FDIs are used for hedging purposes or are themselves hedged against equal and opposite trades, this calculation may not reflect the true economic risk of the Fund.

Wellington Management Funds (Luxembourg)

Wellington Opportunistic Emerging Market Debt II Fund (continued)

Investment Manager's report (continued)
June 30, 2023

Investment Objective & Policy (continued)

If the expected level of leverage were calculated on this basis (taking into account any netting of foreign exchange forward contracts) the level of leverage would be expected to be significantly lower and generally between 0 - 200% of the Net Asset Value. Further information on leverage and its calculation can be found in the section of the Prospectus entitled Leverage.

The full investment objective and policies are defined in the Fund's Prospectus.

Performance

The Wellington Opportunistic Emerging Market Debt II Fund launched on October 15, 2012 with an S EUR Q1 (hedged-distributing) class. The table below details the performance of all funded classes within the Fund.

	Total Returns (%)					
	Periods ended June 30, 2023					
	6 Mths	1 Year	3 Years	5 Years	Since Inception*	Inception Date
Class S EUR Q1 (hedged-distributing)	2.00%	2.89%	(5.45%)	(1.57%)	N/A	October 15, 2012
JP Morgan Emerging Markets Bond Index						
Global ex CCC hedged to EUR	1.69%	2.96%	(4.54%)	(0.96%)	N/A	

Fund returns are net of fees and expenses as adjusted for re-investment of distribution.

Returns for periods of greater than one year are annualised.

All classes are accumulating and unhedged unless otherwise noted.

The figures stated in this report are historical and not necessarily indicative of future performance.

* The since inception total return is not disclosed for classes aged 10 years and more.

June 30, 2023

1. Significant events during the financial period

(a) *With effect from January 1, 2023 the following changes were implemented to the Prospectus:*

- Pre-contractual disclosure information ("PCD") – incorporated into the Prospectus from 1st January for Article 8 and Article 9 Funds in line with the requirements of SFDR Level II. In addition, the do no significant harm ("DNSH") test which is applied to Sustainable Investments made by the Funds, will now take into account each of the mandatory corporate and/or sovereign Principal Adverse Impacts ("PAI's") under SFDR. This may result in divestment from certain holdings which no longer meet the new DNSH assessment;
- Update of ICE Bank of America Index name: to remove 'Merrill Lynch' due to rebranding in 2019;
- The investment management fee for the Funds will now be paid to Wellington monthly, rather than quarterly;
- Wellington Asia Technology Fund: clarification of the Fund's benchmark as the MSCI All Country Asia Pacific Technology Custom Sector Index.

(b) *Changes to the Investment Manager*

- From January 1, 2023 Wellington Asia Technology Fund appointed Wellington Management Singapore Pte Ltd as the Investment Manager.

(c) *Unit classes launched or liquidated during the financial period*

Details of unit classes launched and liquidated during the financial period ended June 30, 2023 are listed in the relevant Investment Manager's Reports.

(d) *Changes to the Management Company's Management:*

- Alan J. Brody resigned from the Board of Managers of the Management Company, with effect June 30, 2023;
- Louise Kooy-Henckel resigned from the Board of Managers of the Management Company, with effect June 30, 2023.

2. Summary of significant accounting policies

(a) *Presentation of financial statements*

The financial statements are prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investments in Transferable Securities.

The financial statements are prepared on a going concern basis.

(b) *Valuation of the investments in securities*

The value of the assets held by each Fund is determined as follows:

- the value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid, and not yet received shall be deemed to be the full amount thereof, unless, however, the same is unlikely to be paid or received in full, in which case the value thereof shall be determined after making such discount as the Management Company may consider appropriate in such case to reflect the true value thereof;
- the value of Transferable Securities and Money Market Instruments and any other assets which are quoted or dealt in on any stock exchange shall be based on the latest available closing price and each of the Transferable Securities and Money Market Instruments and any other assets traded on any Other Regulated Market shall be valued in a manner as similar as possible to that provided for quoted securities;
- for non-quoted assets or assets not traded or dealt in on any stock exchange or Other Regulated Market, as well as quoted or non-quoted assets on such other market for which no valuation price is available, or assets for which the quoted prices are not representative of the fair market value, the value thereof shall be determined prudently and in good faith by the Management Company on the basis of foreseeable purchase and sale prices;
- shares or units in underlying open-ended UCIs shall be valued at their last determined and available net asset value or, if such price is not representative of the fair market value of such assets, then the price shall be determined by the Management Company on a fair and equitable basis. Units or shares of a Closed End Fund will be valued at their last available stock market value;

June 30, 2023

2. Summary of significant accounting policies (continued)

(b) Valuation of the investments in securities (continued)

Money Market Instruments with a remaining maturity of less than 90 days at the time of purchase or securities whose applicable interest rate or reference interest rate is adjusted at least every 90 days on the basis of market conditions shall be valued at cost plus accrued interest from its date of acquisition, adjusted by an amount equal to the sum of (i) any accrued interest paid on its acquisition and (ii) any premium or discount from its face amount paid or credited at the time of its acquisition, multiplied by a fraction the numerator of which is the number of days elapsed from its date of acquisition to the relevant Dealing Day and the denominator of which is the number of days between such acquisition date and the maturity date of such instruments;

Money Market Instruments with a remaining maturity of more than 90 days at the time of purchase shall be valued at their market price. When their remaining maturity falls under 90 days, the Management Company may decide to value them as stipulated above;

- liquid assets may be valued at nominal value plus any accrued interest or on an amortised cost basis. All other assets, where practice allows, may be valued in the same manner;
- the liquidating value of futures, forward and options contracts not traded on exchanges or on Other Regulated Markets shall mean their net liquidating value determined, pursuant to the policies established by the Management Company, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward and options contracts traded on exchanges or on Other Regulated Markets shall be based upon the last available settlement prices of these contracts on exchanges and/or Regulated Markets on which the particular futures, forward or options contracts are traded by the Umbrella Fund; provided that if a futures, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Management Company may deem fair and reasonable;
- all other assets of any kind or nature will be valued at their net realisable value as determined in good faith by or under the responsibility of the Management Company in accordance with generally accepted valuation principles and procedures.

Whenever a foreign exchange rate is needed in order to determine the net asset value of a Fund, the last available mean rate at 11 a.m. New York time on the Dealing Day will be used.

The Management Company is authorised to apply other adequate valuation principles for the total assets of the Umbrella Fund and the assets of an individual Fund if the aforementioned valuation criteria appear impossible or inappropriate, or due to extraordinary circumstances or events.

In the case of extraordinary circumstances, the Management Company may cancel a valuation and replace it with another valuation.

In the case of extensive or unusually large redemption applications, the Management Company may establish the value of the units of the relevant Fund on the basis of the prices at which the necessary sales of securities are effected. In such an event, the same basis for calculation shall be applied for conversion and subscription applications submitted at the same time.

Funds may suffer dilution of the net asset value per units due to investors buying or selling units at a price that does not take into account dealing and other costs arising when the Investment Manager makes or sells investments to accommodate cash inflows or outflows. To counteract this, a Partial Swing Pricing mechanism may be adopted to protect Unitholders' interests.

(c) Net realised appreciation/(depreciation) on sales of securities

The net realised appreciation/(depreciation) on sales of securities is calculated on the basis of the average cost of the securities sold.

Wellington Management Funds (Luxembourg)

Notes to the financial statements (continued)

June 30, 2023

2. Summary of significant accounting policies (continued)

(d) Foreign exchange translations

The combined financial statements are expressed in US Dollars and the financial statements of the Funds are expressed in the relevant base currency. The net assets of a Fund that is denominated in another currency than US Dollars is translated into US Dollars at the exchange rate prevailing at the financial period-end. The average exchange rate for the financial period is used to translate the foreign currency amounts in the combined statement of operations and changes in net assets into US Dollars for the combined financial statements.

Bank accounts, market value of the investment portfolios, and other assets or liabilities expressed in currencies other than the base currency of the relevant Fund are translated into the base currency of the relevant Fund at applicable exchange rates prevailing at the end of the financial period.

Dividends are converted using currency exchange rates prevailing at the ex-dividend date.

Other income and expenses expressed in currencies other than US dollars are translated into US dollars at the applicable exchange rates prevailing at payment date or at the exchange rates prevailing at the end of the financial period if they are accrued. Resulting realised and unrealised foreign exchange appreciations or depreciations are included in the combined statement of operations and changes in net assets.

As at June 30, 2023 the Umbrella Fund applied the following foreign exchange rates to US Dollars:

AED	3.6731	KRW	1,317.6500
AUD	1.5023	KZT	450.8550
BRL	4.8240	MXN	17.1505
CAD	1.3233	MYR	4.6675
CHF	0.8947	NOK	10.7136
CLP	802.1500	NZD	1.6323
CNH	7.2748	PEN	3.6248
CNY	7.2641	PHP	55.1995
COP	4,175.7750	PLN	4.0630
CZK	21.7769	RON	4.5456
DKK	6.8249	RUB	89.5000
EGP	30.9000	SAR	3.7507
EUR	0.9166	SEK	10.8013
GBP	0.7866	SGD	1.3534
HKD	7.8366	THB	35.4550
HUF	341.8882	TRY	26.0700
IDR	14,992.5000	TWD	31.1445
INR	82.0363	VND	23,585.0000
JPY	144.5350	ZAR	18.8913
KES	140.6000		

(e) Cost of investment securities

The cost of investment securities expressed in currencies other than the base currency of the relevant Fund is translated into the base currency of the relevant Fund at the exchange rate prevailing at the transaction date.

(f) Dividend and interest income

Dividend income is recorded on the ex-dividend date and is shown net of non-recoverable withholding taxes. Dividend income not yet received is included in "dividend income receivable" in the combined statement of net assets. Dividend expenses is included in "dividend payments on derivatives" in the combined statement of operations and changes in net assets. Interest income (including amortisation of premium and discount) is accrued daily. Interest income not yet received is included in "interest receivable" in the combined statement of net assets. Interest expenses are included in "interest expense on derivatives" in the combined statement of operations and changes in net assets.

(g) Financial derivative instruments

Realised appreciation or depreciation and change in unrealised appreciation or depreciation are recorded under 'net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' and under 'net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' in the combined statement of operations and changes in net assets respectively.

June 30, 2023

2. Summary of significant accounting policies (continued)

(g) *Financial derivative instruments (continued)*

(i) *Forward and spot foreign exchange contracts*

The unrealised gain or loss on open forward foreign exchange contracts and open spot foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial period-end. The forward rates applied at period end were pulled at 11:00 a.m. New York time. For each relevant Fund, gains or losses on open spot foreign exchange contracts are included in 'cash and cash equivalents' in the combined statement of net assets.

(ii) *Future contracts*

Initial margin deposits are made to the broker upon entering into future contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised appreciations or depreciations by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised depreciations or appreciations are incurred. When the contract is closed, a realised appreciation or depreciation is recorded.

This realised appreciation or depreciation is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Margin accounts are currently recorded under 'margin cash held with/due to brokers' in the combined statement of net assets.

(iii) *Options purchased and options written*

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased.

Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realised depreciations. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Fund.

When an option is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations.

If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security, foreign currency or index in determining whether the relevant Fund has realised an appreciation or a depreciation.

If a written put option is exercised, the premium reduces the cost basis of the security, foreign currency or index purchased by the relevant Fund.

Options purchased are recorded under 'Investment in options purchased at market value' and options written are recorded under 'Investment in options written at market value' in the combined statement of net assets.

Over The Counter options ("OTC options") are marked to market based upon daily prices obtained from third party pricing agents and verified against the value from the counterparty.

(iv) *Swaptions*

A swaption is an option (see Note 2g(iii)) that grants the right, with no obligation, to enter into an underlying swap on pre-agreed terms. A payer swaption gives the owner of the swaption the right to enter into a swap where they pay the fixed leg and receive the floating leg. A receiver swaption gives the owner of the swaption the right to enter into a swap where they pay the floating leg and receive the fixed leg.

Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised depreciations. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been 'swapped'.

June 30, 2023

2. Summary of significant accounting policies (continued)

(g) *Financial derivative instruments (continued)*

(iv) *Swaptions (continued)*

When a swaption is written, an amount equal to the premium received by the relevant Fund is recorded as a liability and is subsequently adjusted to the current market value of the swaption written. Premiums received from written swaptions that expire unexercised are treated by the relevant Fund on the expiration date as realised appreciations. If a written swaption is exercised, the premium is added to the proceeds of the underlying swap in determining whether the relevant Fund has realised an appreciation or a depreciation.

(v) *Swaps*

The change in the value of the swap is reported within 'investment in swaps at market value' in the combined statement of net assets, until termination of the contract when it is realised.

Periodic interest payments to be paid or received are accrued on a daily basis and included in interest income or interest expense. Premiums paid or received when entering into the agreement are recorded at cost and reflected under either 'receivable from brokers' or 'payable to brokers' in the combined statement of net assets.

- Credit default swaps

The buyer of protection in a credit default swap agreement is obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

- Interest rate swaps

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

- Total return swaps

The Funds may enter into total return swap contracts in which the relevant Fund and the counterparties agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index, commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices.

(h) *Partial Swing Pricing*

Funds may suffer dilution of the net asset value per units due to investors buying or selling units at a price that does not take into account dealing and other costs arising when the Investment Manager makes or sells investments to accommodate cash inflows or outflows. To counteract this, a Partial Swing Pricing mechanism may be adopted to protect Unitholders' interests.

If on any valuation point on any dealing day, the aggregate net transactions in units for a Fund exceed a pre-determined threshold, as determined by the Management Company from time to time, the net asset value may be adjusted upwards or downwards to reflect net inflows and net outflows respectively, and is a means of apportioning expected trading costs associated with such transactions to the investors that create these costs in order to protect existing or remaining Unitholders.

The extent of the swing factor price adjustment will be set by the Management Company to reflect bid-ask spreads, transaction taxes, dealing and other costs and may include an adjustment reflecting some portion, or the full value, of illiquid securities, which cannot be sold at the time of the redemption due to unforeseen events such as sanctions, capital controls or absence of trading activity. The adjustment for the illiquid securities will be accounted for as a valuation reserve until such time as the securities become liquid, are sold, or are written off. As a result, redeeming Unitholders may not realize any value on these illiquid securities if they ultimately become liquid and have value. Partial swing pricing may be applied by the Management Company to any Fund of the Umbrella Fund and is not aimed at addressing the specific circumstances of each individual investor transaction.

June 30, 2023

2. Summary of significant accounting policies (continued)

(h) *Partial Swing Pricing (continued)*

The swing factor and swing thresholds are set and reviewed on a quarterly basis by a Wellington Management group swing pricing review governance group, which reports to the Board of Managers of the Management Company on a quarterly basis. This group has the ability to respond to market events (e.g. higher market volatility) and make intra quarter adjustments. In any other cases where there are net subscriptions or redemptions in the Funds and the Management Company reasonably believes that imposing a partial swing price is in the best interests of existing Unitholders, the Management Company may, at its discretion, impose one.

(i) *Collateral*

In order to limit counterparty risk the Umbrella Fund put a collateralisation process in place. Broker cash received as collateral for financial derivative instruments transactions is recorded as an asset on the combined statement of net assets under 'cash collateral received from brokers' and a related liability to repay the collateral is disclosed as 'cash collateral due to brokers'.

A Fund's assets may be deposited with brokers by or on behalf of the Fund for collateral purposes. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the statement of net assets. Cash pledged by the Funds as collateral is recognised on the combined statement of net assets as 'cash collateral deposited with brokers'.

(j) *Capital gains tax*

No tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Funds, however, the Funds may incur foreign taxes on capital gains upon realization of their assets.

3. Charges and expenses

(a) *Investment management fees*

An Investment Management Agreement ("IMA") was entered into for the Funds for an indefinite period of time between the Management Company and the Investment Manager.

The Investment Manager shall be paid an investment management fee out of the assets of each of the Funds. The investment management fee is calculated as a percentage of the daily net assets attributable to the relevant unit class, accrued daily in the net asset value of the relevant unit class and paid monthly in arrears at the annual rates.

In addition to the investment management fee, a performance fee will also be payable in respect of certain Funds as described in further detail in the Performance fee section (Note 3d).

Where permitted by applicable regulation, the Investment Manager may in its own discretion, rebate out of its own assets all or a portion of its fees to financial intermediaries who purchase or solicit sales of units of the Funds for their underlying clients. Investors should ask their financial intermediaries about any such payments they may receive, and any associated conflicts of interest they may have in recommending a Fund. Financial intermediaries may impose additional costs and fees in connection with their own programs or services. In addition, the Investment Manager may enter into an alternative fee arrangement, or may vary the structure of existing fee arrangements, for any single Unitholder. This will result in some investors paying lower investment management or performance fees than other investors.

The investment management fee rates applicable to each of the unit classes are outlined later (Note 3e).

(b) *Distribution fees*

Unitholders in the class D units, class G units and class DL units of each Fund will be paid a distribution fee, out of the assets of the relevant Fund attributable to those unit classes. The distribution fee is calculated as a percentage of the daily net assets attributable to those units held by the relevant Unitholder, accrued daily in the net asset value of the relevant unit class and paid quarterly in arrears at the annual rates.

The distribution fee is paid to intermediaries holding these unit classes to compensate them for distribution and Unitholder services provided to underlying beneficial owners of these units. Investors considering investing via an intermediary should be aware of these fees and the potential for conflicts of interest that they create where, for example, an intermediary might be incentivised to recommend a particular Fund, or unit class within a Fund, that has a higher distribution fee.

June 30, 2023

3. Charges and expenses (continued)

(b) Distribution fees (continued)

The distribution fee rates applicable to each of the unit classes are outlined later (Note 3e).

(c) Administrative fee

The Management Company shall be paid an administrative fee out of the assets of each of the Funds attributable to the relevant unit classes. This administrative fee is calculated as a percentage of the daily net assets of that unit class, accrued daily in the net asset value of the relevant unit class and paid quarterly in arrears.

The administrative fee rate will vary across Funds and unit classes reflecting the differing expenses of such Funds and/or unit classes but the maximum administrative fee that is paid shall not exceed 0.25% per annum for all unit classes with the exception of unit classes BN, D, N, DL, G and NE where the maximum administrative fee that is paid shall not exceed 0.40% per annum.

The purpose of the administrative fee is to provide a fixed rate of fees which covers the expenses of the Funds which expenses might otherwise be subject to fluctuation over time. The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds had chosen to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon giving not less than 1 month notice to affected Unitholders.

The administrative fees are fixed which means that the Management Company, or other Wellington Management affiliate elected by the Management Company will bear any costs and expenses incurred by the relevant unit classes in any period in excess of the administrative fee charged to the unit classes. The Management Company will at all times be entitled to receive the entire amount of the administrative fee paid to it and retain the portion which exceeds the actual operating expenses incurred by the relevant unit classes during the period, if any. The Management Company in its discretion may choose to waive a portion of the administrative fee as the level of assets in a particular Fund increases; however, as the level of assets in a particular Fund decreases, the Management Company withdraw any waiver of the administrative fee. The maximum administrative fee per unit class is disclosed above.

Further, the Management Company may instruct the Umbrella Fund to pay a portion of the administrative fee directly out of the assets of the Fund to any third party service providers. In such case, the administrative fee due to the Management Company will be reduced by the same amount.

The administrative fee covers the following expenses, if applicable to the relevant unit class:

- Depositary fees and reasonable out of pocket expenses;
- Administrator Agent fees and reasonable out of pocket expenses;
- Transfer Agent fees and reasonable out of pocket expenses;
- Management Company fees relating to the provision, procuring, overseeing and/or monitoring of various services to the Umbrella Fund and the Funds by the Management Company and its affiliates, including, but not limited to, administrative, domiciliary, corporate, company secretarial, risk management, regulatory compliance and reporting services and fees incurred by affiliates of the Management Company and payable to third parties providing infrastructure and other support services;
- fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred, including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third parties service providers, and the provision of additional marketing support. For the avoidance of doubt, these fees do not include the distribution fees payable to financial intermediaries and / or other distributors described under the 'Distribution fees' section above;
- fees of Managers of the Management Company who are not employed by affiliates of the Management Company as well as reasonable out of pocket expenses incurred in discharging their Management Company duties;
- Auditor's fees and reasonable out of pocket expenses;
- professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other advisers or third party support services) that may be incurred by the Management Company, the Depositary, the correspondents or the Administrator while acting in the interest of the Unitholders;
- the cost of taking out and maintaining any insurance policy in relation to the Umbrella Fund, the Management Company and/or the Managers;
- the Luxembourg tax d'abonnement being 0.05% per annum for class BN units, class D units, class N units, class DL units or 0.01% per annum for class S units, class G units, class J units, class SP units, class SF units and class T units;
- any start-up costs associated with the creation of a new Fund or class and the offer of its units;

June 30, 2023

3. Charges and expenses (continued)

(c) *Administrative fee (continued)*

- the costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Umbrella Fund, including, without limitation, the Prospectus (as well as any amendments or supplements), KIDs, Fact sheets, websites, annual and semi-annual reports or other documents as may be required under the Management Regulations or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing units of the Umbrella Fund (including any paying agents', lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of Funds;
- fees payable to third parties for class currency management services in relation to the execution of currency hedging transactions for hedged unit classes.

The following expenses are not covered by the administrative fee and will be paid by the Umbrella Fund out of the assets of each Fund:

- investment management fees;
- performance fees;
- distribution fees as described under the 'Distribution fees' section above;
- all taxes (including, without limitation, all income and franchise taxes but excluding the Luxembourg tax d'abonnement), levies, duties or similar charge which may be due on or with respect to the assets and the income of the Umbrella Fund;
- all costs (including brokerage fees) of purchasing or selling assets of the Umbrella Fund including but not limited to brokerage charges, subscription and redemption charges, anti-dilution levies, implicit transactions costs, costs associated with execution/trading or settlement platforms, costs associated with derivative use and any losses incurred in connection therewith are for the account of the relevant Fund;
- the costs of borrowing including interest expenses;
- any extraordinary expenses, such as litigation (for instance, fees connected with the filing of class action lawsuits), exceptional measures, particularly, legal, business or tax expert appraisals or legal proceedings undertaken to protect unitholders' interests and all similar charges and expenses.

Such fees, duties and charges will be charged to a Fund or unit class in respect of which they were incurred or, where an expense is not considered by the Managers to be attributable to any one Fund, the expense will be allocated by the Managers with the approval of the Depositary, in such manner and on such basis as the Managers in their discretion deem fair and equitable.

The Management Company implemented a volume discount mechanism ("VDM") on the administrative fee which allows the Funds to pass on economies of scale achieved by a Fund reaching significant level of assets.

The administrative fee rates applicable to each of the unit classes of each of the Funds are outlined later (Note 3e).

(d) *Performance fees*

In addition to the base investment management fee, the Investment Manager may also be paid a performance fee, based on the unsprung unit class' net return or net asset value per unit but inclusive of any performance fee previously accrued in respect of such performance period.

The performance fee is accrued daily in the net asset value of each relevant class and is calculated as described below in respect of the relevant performance fee mechanism.

The period at the end of which the accrued performance fee is crystallised and paid (the "performance period") is generally the Fund's fiscal year (January 1 — December 31), but may also a) begin mid-year in certain circumstances from the launch of a Fund or unit class and b) end mid-year from the previous performance period's end to the closure of a Fund or unit class. For Funds using the High Water Mark and performance benchmark with High Water Mark mechanisms in cases of a launch of a Fund or a unit class in the ongoing performance period the performance fee will crystallise at the end of the current performance period. When this occurs, the performance period may be less than one calendar year. For Funds using the performance benchmark mechanism in cases of a launch of a Fund or a unit class in the ongoing performance period the performance fee will crystallise at the end of the immediately following performance period. When this occurs, the performance period may be longer than one calendar year.

June 30, 2023

3. Charges and expenses (continued)

(d) Performance fees (continued)

Subject to the exceptions above, the performance fee is crystallised at the end of each performance period and is paid annually in arrears as soon as practicable after the end of the relevant performance period. The end of the performance period is generally the Fund's fiscal year end, except where a Fund or unit class closes mid-year as described above. As well as crystallising at the end of each performance period, performance fees are crystallized on any Dealing Day (other than the last Business Day of the performance period) in which there is a net reduction in the number of units in a unit class. Any accrued performance fee with respect to such net redemption of units will crystallise on that Dealing Day and will be paid as soon as is practicable to the Investment Manager.

For certain unit classes a High Water Mark, Performance Benchmark or Performance Benchmark with a High Water Mark may also be applicable:

(i) High water mark (HWM)

Where a HWM mechanism applies, a performance fee will be accrued on the basis of a unit class' net asset value per unit in excess of the HWM, over a performance period multiplied by the average number of units in issue for the fiscal year calculated on each Business Day. The average number of units used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of units in a unit class. At the launch of a unit class, the HWM means the Initial Issue Price and is taken as the starting point for the performance fee calculation. If the net asset value per unit on the last Business Day of a performance period is higher than the previous HWM, the HWM is set to the net asset value per unit calculated at the end of the performance period. To the extent that the unit class' net asset value per unit did not exceed its HWM at the end of a performance period, the HWM is carried forward, and no performance fees will be accrued until the net asset value per unit of that unit class exceeds its HWM in a subsequent performance period. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise. The HWM will be adjusted for any distributions in the case of a distributing unit class.

(ii) Performance benchmark

Where a performance benchmark applies, a performance fee may be accrued on the basis of a unit class' net return per unit in excess of the return of the performance benchmark over a performance period, multiplied by the average number of units in issue for the fiscal year calculated on each Business Day. The average number of units used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of units in a unit class. The performance benchmark is expressed in the denomination currency of the relevant unit class, or for hedged unit classes, hedged to the denomination currency of the relevant class.

If the net return per unit on the last Business Day of a performance period is higher than the performance benchmark over the same period, the performance fee will crystallise. The return per unit may exceed the performance benchmark and crystallise a performance fee even where the unit class' net asset value per unit decreases. This means that a performance fee may be paid even in the event where the unit class' net asset value per unit decreases, as long as the return per unit exceeds the performance benchmark. To the extent that a unit class' net return per unit did not exceed its performance benchmark at the end of a performance period, no performance fee will accrue until the unit class' net return per unit's cumulative net return exceeds the cumulative performance benchmark return over the same period. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise. The performance benchmark will be adjusted for any distributions in the case of a distributing unit class.

(iii) Performance benchmark with HWM

Where a performance benchmark with a HWM applies, a performance fee will be accrued on the basis of a unit class' net return per unit in excess of the performance benchmark and the net asset value in excess of the HWM, over a performance period, multiplied by the average number of units in issue for the fiscal year calculated on each Business Day. The average number of units used for the performance fee calculation is calculated on each Business Day and adjusted on any Dealing Day in which there is a net reduction of units in a unit class.

Wellington Management Funds (Luxembourg)

Notes to the financial statements (continued)

June 30, 2023

3. Charges and expenses (continued)

(d) Performance fees (continued)

(iii) Performance benchmark with HWM (continued)

The performance benchmark is expressed in the denomination currency of the relevant unit class, or for hedged unit classes, hedged to the denomination currency of the relevant class. At the launch of a unit class, the HWM means the Initial Issue Price and is taken as the starting point for the performance fee calculation. If (i) the net return per unit on the last valuation day of a performance period is higher than the performance benchmark over the same period and (ii) the net asset value per unit is higher than the previous HWM, then the performance fee will crystallise. If the net asset value per unit on the last Business Day of a performance period is higher than the previous HWM, the HWM is set to the unswung net asset value calculated at the end of the performance period. To the extent that a unit class' net return per unit did not exceed its performance benchmark and the net asset value per unit did not exceed the HWM at the end of a performance period, no performance fee will accrue until the unit class' cumulative net return exceeds the cumulative performance benchmark return and the net asset value per unit exceeds the HWM over the same period. When this occurs, the performance period will extend beyond one year and continue until the next performance period when a performance fee does crystallise. The HWM and performance benchmark will be adjusted for any distributions in the case of a distributing unit class.

The mechanisms employed in respect of performance fees are detailed for each relevant Fund below.

Fund name	Performance benchmark	High Water Mark	Unit class	Performance fee
Wellington US Research Equity Fund	S&P 500 Net Index	N/A	SP	20%
Wellington Global Total Return Fund (UCITS)	ICE Bank of America 3-Month T-Bill Index	Yes	S, D, DL, N	20%

In respect to hedged classes the performance benchmark is expressed hedged to the denomination currency of the relevant unit class.

(iv) Further Considerations

Due to differences in timing between their date(s) of investment and a unit class' performance fee calculation period, subscribers and Unitholders of the Fund should be aware that their own individual performance experience as a Unitholder may not be equivalent to the actual performance of the Fund on which the performance fee is calculated and paid, and the performance fee paid to the Fund may be higher or lower than the actual performance they experience as a Unitholder. Although a daily accrual of a portion of the performance fee in a unit class' net asset value mitigates some of these timing differences, the performance fee is calculated and paid based on the unit class' fiscal year assets and performance, not on the basis of a Unitholder's specific assets or performance.

The unit class' net return on which the performance fee is based, includes net unrealised gains and losses as at the end of each calculation period and as a result, a performance fee may be paid on unrealised gains which may subsequently never be realised. The performance fee is calculated prior to any dilution adjustments and the methodology is verified by the Depositary on a periodic basis.

Performance fees are paid even where the relevant HWM is surpassed, which may be achieved due to market movements.

For further information and worked example of the performance fees calculations, please refer to the Prospectus.

The below table shows the actual performance fees incurred by unit class of Fund and the relevant Total Expense Ratio ("TER") for a period of one year expressed as a percentage of the average net asset value of the Fund for the corresponding period of one year. Calculations are related to a period of less than a year and have been annualised.

TER have been calculated in accordance with the requirements of Asset Management Association Switzerland ("AMAS") guidelines.

S EUR Q1 (hedged-distributing)	0.55%	-	0.12%	0.67%

4. Transaction costs

Transaction costs are the costs incurred by a Fund in connection with transactions on its portfolio of investments. These costs are both incremental and directly attributable to the acquisition, issue or disposal of financial assets and liabilities, with incremental costs being those that would not have been incurred if the Fund had not entered into the transaction. These costs comprise fees and commissions paid to agents, advisers, brokers and dealers, in addition to any taxes associated with the transaction.

Transaction costs for each Fund for the financial period ended June 30, 2023 are disclosed below:

Fund		Brokerage Cost	Local Market Taxes	Total
Wellington Asia Technology Fund	USD	89,866	192,448	282,314
Wellington Asian Opportunities Fund	USD	170,729	214,556	385,285
Wellington Climate Strategy Fund	USD	69,346	47,360	116,706
Wellington Downside Alpha Opportunities Fund	USD	20,391	26,680	47,071
Wellington Emerging Markets Research Equity Fund	USD	709,118	991,779	1,700,897
Wellington Global Innovation Fund	USD	64,196	61,663	125,859
Wellington Global Opportunities Equity Fund	USD	61,879	46,839	108,718
Wellington Global Quality Growth Fund	USD	2,288,468	2,249,252	4,537,720
Wellington Global Research Equity Fund	USD	228,577	201,115	429,692
Wellington Global Select Capital Appreciation Equity Fund	USD	23,146	28,857	52,003
Wellington US Research Equity Fund	USD	291,078	1	291,079
Wellington Global Total Return Fund (UCITS)*	USD	-	-	-
Wellington Opportunistic Emerging Market Debt II Fund*	USD	-	-	-

* For debt securities and derivatives, transaction costs are not separately identifiable from the purchase price of the security and therefore cannot be disclosed separately.

These amounts are included in 'net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' and in 'net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' in the combined statement of operations and changes in net assets.

5. Total return swaps

As at June 30, 2023 the Funds held the following total return swaps:

(a) *Wellington Asia Technology Fund*

(i) *Total return equity swaps*

For long equity swap positions, the Fund receives the return on the underlying equities in exchange for an interest payment, the terms of which will vary by dealer and market. For short equity swap positions, the Fund receives payment of interest, the terms of which will vary by dealer and market, and pays the return generated by the underlying equity. Underlying positions may change on a daily basis as determined by the Investment Manager.

Wellington Management Funds (Luxembourg)

Notes to the financial statements (continued)

June 30, 2023

5. Total return swaps (continued)

(a) *Wellington Asia Technology Fund (continued)*

(i) *Total return equity swaps (continued)*

As at June 30, 2023 the Fund held the following total return equity swaps under the counterparties as presented in the table below.

Sector

<u>Quantity</u>	<u>CCY</u>	<u>Sector name</u>	<u>Termination date</u>	<u>Market value USD</u>	<u>% net assets</u>
Goldman Sachs					
48,700	USD	Software & services	31/05/2024	(17,508)	(0.01)
186,800	USD	Software & services	28/06/2024	(70,871)	(0.02)
		Total Goldman Sachs		(88,379)	(0.03)
		Total total return equity swaps		(88,379)	(0.03)

Country

<u>Quantity</u>	<u>Country</u>	<u>Market value USD</u>	<u>% net assets</u>
235,500	China	(88,379)	(0.03)
	Total total return equity swaps	(88,379)	(0.03)

A positive notional amount indicates that the Fund receives the return generated by the underlying assets. A negative notional amount indicates that the Fund pays the return generated by the underlying assets.

6. Dividend distributions

The Management Company may decide whether and to what extent net investment income and net realised and unrealised capital appreciations will be distributed with respect to any Fund.

The following distributions were declared for the financial period ended June 30, 2023.

Wellington Climate Strategy Fund

<u>Class</u>	<u>Ex. date</u>	<u>Pay date</u>	<u>Distribution rate</u>	<u>Total amount paid USD</u>

			Total	18,174,611

For equity Funds, distributions to the holders of distributing unit classes generally will be declared and paid quarterly or annually. For fixed income Funds, distributions to the holders of distributing unit classes will generally be declared and paid monthly or quarterly.

7. Partial Swing Pricing

The following table provides details of the swing factors in place as at June 30, 2023:

<u>Fund</u>	<u>Swing factor %</u>	<u>Methodology</u>
Wellington Asia Technology Fund	0.10	In/Out
Wellington Asian Opportunities Fund	0.15	In/Out
Wellington Climate Strategy Fund	0.02	In/Out
Wellington Downside Alpha Opportunities Fund	0.05	In/Out
Wellington Emerging Markets Research Equity Fund	0.15	In/Out
Wellington Global Innovation Fund	0.02	In/Out
Wellington Global Opportunities Equity Fund	0.05	In/Out
Wellington Global Quality Growth Fund	0.05	In/Out
Wellington Global Research Equity Fund	0.05	In/Out
Wellington Global Select Capital Appreciation Equity Fund	0.05	In/Out
Wellington US Research Equity Fund	0.01	In/Out
Wellington Global Total Return Fund (UCITS)	0.20	In Only
Wellington Opportunistic Emerging Market Debt II Fund	0.90	In Only

As at June 30, 2023, no swing pricing was applied to the Funds.

8. Subsequent events

(a) *With effect from July 1, 2023 the following changes were implemented to the administrative fee rates for the Wellington Emerging Markets Research Equity Fund:*

- Change of unit classes D, DL and N from 0.34% to 0.35%;
- Change of unit classes S, T and J from 0.19% to 0.20%.

(b) *Changes to the Conducting Officers of the Management Company:*

- Jennifer Nye was appointed as the Conducting Officer and Compliance Officer for Wellington Luxembourg S.à r.l. with effect from August 14, 2023.

Wellington Management Funds (Luxembourg)

Appendix 1 – Securities Financing Transactions Regulation ("SFTR")

June 30, 2023

The SFTR introduces, inter alia, reporting requirements for securities financing transactions ("SFTs") and total return swaps. Article 13 of SFTR, which sets out the information to be included in Semi-Annual reports, came into effect on January 13, 2017 and impacted Funds reporting after this date.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at June 30, 2023, the Fund held total return swaps which is a type of securities in scope for the SFTR Semi-annual Report Disclosure Requirements.

With the exception of data relating to returns and costs, all data shown below reflects positions held as at June 30, 2023.

a. Market value

The amount of assets across total return swaps as at June 30, 2023 is as follows:

Wellington Asia Technology Fund

Type of asset	Amount USD*	% of AUM**
Total return swaps	1,053,323	0.36%

* Amount represents the total of absolute market exposure at the time of acquisition expressed in the base currency of the Fund. The exposure is calculated based on the sum of notional amounts.

** Assets Under Management is equivalent to total net assets as disclosed in the financial statements.

b. Counterparties

Top 10 largest counterparties across all total return swaps as at June 30, 2023 are as follows:

Wellington Asia Technology Fund

Security type	Counterparty*	Country	Amount USD**
Total return swaps	Goldman Sachs	United States	1,053,323
		Total	1,053,323

* This list is a complete list of the counterparties across total return swaps as at June 30, 2023.

** Amount represents the total of absolute market exposure at the time of acquisition expressed in the base currency of the Fund. The exposure is calculated based on the sum of notional amounts.

c. Data on reuse of collateral

There was no collateral reused held as at June 30, 2023.

d. Safekeeping of collateral received

There was no cash collateral received across total return swaps held as at June 30, 2023.

e. Settlement/clearing across total return swaps

Bi-Lateral.

f. Maturity tenor of collateral received/granted

The maturity tenor of the collateral is broken down into the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity.

(i) Maturity tenor of collateral received

There was no collateral received across total return swaps held as at June 30, 2023.

(ii) Maturity tenor of collateral granted

There was no collateral granted across total return swaps held as at June 30, 2023.

Wellington Management Funds (Luxembourg)

Appendix 1 – Securities Financing Transactions Regulation ("SFTR") (continued)

June 30, 2023

g. Listed below are the type, quality and currency of collateral received

There was no collateral received across total return swaps held as at June 30, 2023.

h. Listed below are the type, quality and currency of collateral granted

There was no collateral granted across total return swaps held as at June 30, 2023.

i. Safekeeping of collateral granted

There was no collateral granted across total return swaps held as at June 30, 2023.

j. Returns and Costs

Returns and costs for total return swaps for the financial period ended June 30, 2023 are as follows:

Wellington Asia Technology Fund

	Amount USD
Total return swaps*	
Net realised appreciation/(depreciation)	(25,072)
Net unrealised appreciation/(depreciation)	(88,379)
Net interest income/(expense)	(4,496)
Net return	(117,947)

* Costs are not identified separately as they are either embedded in spreads or form part of other costs disclosed in the combined statement of operations and changes in net assets.

k. Aggregate transaction data

The aggregate transaction data of total return swaps as at June 30, 2023 is as follows:

(i) Maturity

The aggregate maturity as at June 30, 2023 is as follows:

Wellington Asia Technology Fund

<u>Maturity</u>	<u>Amount USD</u>
Total return swaps	
Three months to one year	1,053,323
Total	1,053,323

(ii) Settlement and clearing

All Funds with total return swaps apply bilateral settlement and clearing mechanism as at June 30, 2023.

There was no collateral received across total return swaps held as at June 30, 2023.
