

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP Mix 20

ISIN: SE0007279757

Storebrand Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's objective is to generate a long-term return that exceeds the return in the markets to which the fund is exposed, defined as the fund's benchmark index, with a high level of risk diversification.

Investment strategy: SPP Mix 20 is a sustainable, actively managed fund of fund and invests mainly in fixed income and equity funds within the Storebrand Group. Normally, exposure is 20% in equity assets and 80% in fixed income assets, but can depending on the manager's market view, deviate by 15 percentage points up or down. Of the equity holdings 25% is invested in the Swedish stock market and the allocation may deviate by a maximum of +/- 10 percentage points. The fixed income assets are placed without geographical limitations. Through analysis and selection, the manager makes active investment decisions and allocates the fund's exposure between asset classes and regions.

The fund follows our standard for sustainable investments, which means, among other things, that we refrain from investing in companies that are in breach of international standards and conventions. These include human rights, labour law and international law, corruption and financial crime, serious climate

and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5 per cent of net sales come from the production and/or distribution of fossil fuels, tobacco, weapons, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

Up to 10% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: MSCI World Index net return 13,5%, MSCI Emerging Markets Index net return 1,5%, SBXCAP Index return 5%, OMRX Mortgage Bond All Index 80%.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and Reward Profile

The **Risk and Reward Indicator** illustrates the link between risk and potential returns from an investment in the fund. The indicator is based on the change in the fund's value over the past 5 years.

This Fund is part of category 3, which means a low risk of upward and downward fluctuation in the net asset value. Category 1 does not mean that the fund is risk-free. The fund's risk indicator can change both upwards and downwards on the scale over time, as the indicator is based on historical data that does not guarantee future risk/returns.

The fund invests in both the equity and fixed income markets. The stock market is generally characterized by high risk while the fixed income market by lower risk. This means that the fund has lower risk than a pure equity fund but a slightly higher risk than a fixed income fund. The possibility for return is thus higher than for a fixed income fund.

The indicator mainly reflects the upward and downward fluctuations in the shares that the Fund has invested in. The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: This occurs when a part of the Fund's assets is difficult to sell at a specified time or at a reasonable price.

Currency risk: If the Fund invests in securities in a foreign currency, the value in Swedish kronor is affected when the exchange rate changes. If a foreign currency weakens against the Swedish krona, the value of holdings purchased in that currency in the Fund decreases.

Credit risk: If an issuer cannot pay interest and the nominal amount in time, the bond may lose all or a significant part of its value.

You can find more information about risks in the Prospectus, which is available from www.storebrandfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge **None**

Exit charge **None**

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge **0,61 %**

Charges taken from the fund under certain specific conditions:

Performance fee **None**

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: MSCI World Index net return 13,5%, MSCI Emerging Markets Index net return 1,5%, SBXCAP Index return 5%, OMRX Mortgage Bond All Index 80%.

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

The fund's return is compared with the index but may deviate from the index.

Previous years' results are no guarantee of future performance.

Fund launched 2015-09-15.
