

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP High Yield Företagsobligation A SEK

ISIN: SE0013877263

SPP Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's objective is to generate a long-term return that exceeds the return in the interest rate markets in which the fund invests, defined as the fund's benchmark index, with a high level of risk diversification.

Investment strategy: The SPP High Yield Företagsobligation is a sustainable, actively managed fixed income fund that invests in Nordic corporate bonds with a low credit rating, High Yield, but can also invest in issuers outside the Nordic region and to a certain extent in corporate bonds with higher credit ratings (Investment Grade). The fund will invest in corporate bonds issued by Nordic issuers and have the opportunity to take positions such as <BBB, split-rating, BB/BBB, BBB with the risk of downgrading to BB or those who do not have an official rating. The focus will be on the BB rating or equivalent and those that do not have an official rating, rather than B, which gives a relatively conservative credit risk. Foreign holdings are hedged to Swedish kronor. The fund focuses on the Nordic region and the average duration is normally between 0 and 4 years. With the help of analysis and selection, the manager makes active investment decisions.

The fund follows our standard for sustainable investments, which means, among other things, that we refrain from investing in

companies that are in breach of international standards and conventions. These include human rights, labour law and international law, corruption and financial crime, serious climate and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5 per cent of net sales come from the production and/or distribution of fossil fuels, tobacco, weapons, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

Up to 20% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

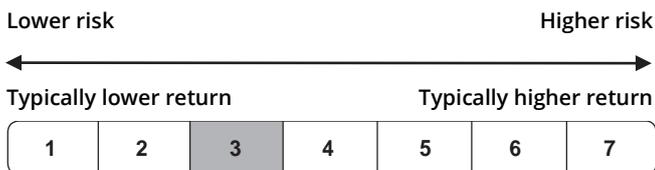

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: Solactive SEK Fix IG Corporate Index

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within three years.

Risk and Reward Profile

The Risk and Reward Indicator shows the relationship between risk and return for the Fund. A higher position on the scale means the possibility of higher returns, but a greater risk of losing money. The indicator is based on how the Fund's value has changed over the course of the past five years.

This Fund is part of category 3, which entails a low risk of upward and downward fluctuation in the unit value. Category 1 does not constitute a risk-free investment. Over time, the Fund may move both to the right and the left on the scale. This is because the indicator is based on historical data that is not a guarantee of future risk/return.

The Fund invests in interest-bearing securities that are generally characterised by a lower risk than the stock market. A corporate bond fund usually has a higher risk than other fixed income funds because it invests in fixed income securities issued by companies.

The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: Occurs if some of the fund's assets are difficult to sell at a certain point in time and/or at a reasonable price. Difficulties in valuing securities may arise to a greater extent for corporate bond funds than for equity funds, partly because the corporate bond market is generally characterized by lower transparency. Pricing of corporate bonds is largely governed by changes in demand and supply. If liquidity in the corporate bond market were to deteriorate significantly, larger withdrawals from the fund could mean that the fund's assets need to be sold at unfavorable prices. In extreme circumstances, redemption of fund units may not be enforceable immediately upon request.

Credit risk: If an issuer cannot pay interest and the nominal amount in time, the bond may lose all or a significant part of its value.

Counterparty risk: Occurs if a counterparty fails to meet its obligations to the Fund, e.g. by not paying an established amount or being unable to provide securities as agreed.

You can find more information about risks in the Prospectus, which is available from www.sppfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge **None**

Exit charge **None**

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge **0,51 %**

Charges taken from the fund under certain specific conditions:

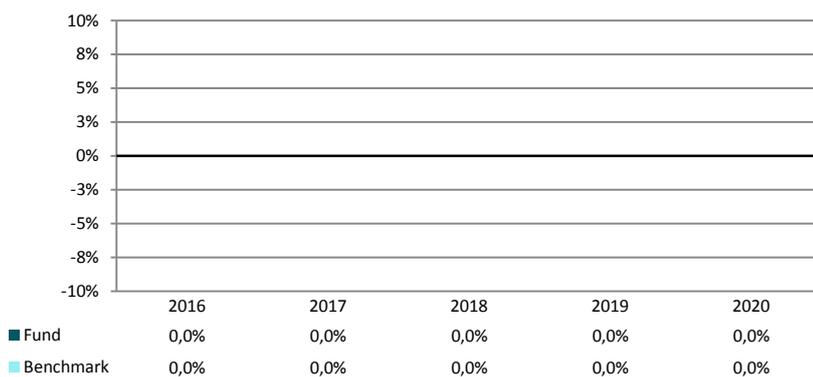

Performance fee **None**

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. In instances where the Fund is newly established, the expected ongoing charges is used. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: Solactive SEK Fix IG Corporate Index

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

Previous years' results are no guarantee of future performance.

Fund launched 2020-06-11.
