

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you to understand the nature and the risk of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SPP Sverige Småbolag Plus A

ISIN: SE0014808382

SPP Fonder AB

Org. Nr: 556397-8922

A subsidiary of Storebrand Asset Management AS

Objectives and Investment Policy

Objective: The fund's objective is to invest in companies with a high sustainability ranking and to reflect the long-term performance for small and medium-sized companies in the Swedish stock market, defined as the fund's benchmark index, with a high level of risk diversification.

Investment strategy: SPP Sverige Småbolag Plus is a fossil-free, index-oriented equity fund that invests in a wide range of shares in different sectors in the Swedish stock market for small and medium-sized companies. The fund invests in shares mainly in companies, which at the time of investment amount to a maximum of one percent of the Swedish stock market's total market value. The fund's performance is compared with an index that reflects the Swedish stock market for small and medium-sized companies. Differences are expected in the return between the fund and the index and these may be significant as the fund follows our criteria for sustainable investments. This means that certain shares that are part of the index are excluded because they do not meet the sustainability requirements. The fund also actively selects companies with a low CO2 footprint and companies with high sustainability ratings. Up to 10 per cent of the fund's assets are invested in solution companies, i.e. companies that are helping contribute to achieving the UN's global sustainable development goals. These companies are not necessarily in the fund's benchmark index.

The fund follows our standard for sustainable investments, which means, among other things, that we refrain from investing in companies that are in breach of international standards and conventions. These include human rights, labour law and international law, corruption and financial crime, serious climate and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5 per cent of net sales come from the production and/or distribution of fossil fuels, tobacco, weapons, alcohol, gambling, pornography, cannabis or companies with large fossil reserves.

Up to 10% of the net asset value of the Fund may also be placed in deposits with credit institutions. To protect the value of the Fund or to save costs, we may use derivatives as a complement.

The Fund does not pay out dividends. Instead, all revenue is reinvested in the Fund

Normally, Funds units may be subscribed or redeemed on any Swedish banking day

Benchmark index: Carnegie Small Cap Return Index Sweden.

Recommendation: This Fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and Reward Profile

The Risk and Reward Indicator shows the relationship between risk and return for the Fund. A higher position on the scale means the possibility of higher returns, but a greater risk of losing money. The indicator is based on how the Fund's value has changed over the course of the past five years.

This Fund is part of category 6, which means a high risk of upward and downward fluctuation in the unit value. Category 1 does not constitute a risk-free investment. Over time, the fund can move both left and right on the scale over time. As the fund has existed for less than 5 years, the indicator has been estimated. Historical data is not a guarantee of future risk/return.

Generally speaking, equity funds are characterised by significant fluctuations in prices. The Fund is exposed to Sweden. This may entail a higher risk than for funds with wider geographical distribution. The indicator mainly reflects the upward and

downward fluctuations in the shares that the Fund has invested in. The following risks may not be fully reflected in the indicator but may affect the value of the Fund:

Liquidity risk: Occurs if some of the fund's assets are difficult to sell at a certain point in time and/or at a reasonable price. Since the fund invests in small and medium-sized companies, the risk may be higher than for equity funds with a broader investment focus, during periods when liquidity in the market is limited. Should liquidity in the market deteriorate significantly, larger withdrawals from the fund may mean that the fund's assets need to be sold at unfavorable prices.

Currency risk: If the Fund invests in securities in a foreign currency, the value in Swedish kronor is affected when the exchange rate changes. If a foreign currency weakens against the Swedish krona, the value of holdings purchased in that currency in the Fund decreases.

Operational risk: Risk of loss due to things such as system failure, human error or external events.

You can find more information about risks in the Prospectus, which is available from www.sppfonder.se.

Charges

One-off charges taken before or after you invest:

Entry charge **None**

Exit charge **None**

This is the maximum that might be taken out of your money before it is invested or the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge **0,51 %**

Charges taken from the fund under certain specific conditions:

Performance fee **None**

The charges constitute payment for the Fund's costs, including marketing and distribution. These reduce the Fund's potential growth.

The ongoing charges is based on the previous calendar year. In instances where the Fund is newly established, the expected ongoing charges is used. The ongoing charges includes the fee payable to the fund management company, as well as the costs of the custodian bank and supervisory authority. The fee may vary slightly from year to year.

For more information about fees, please refer to the Fund's Prospectus.

Past Performance

Benchmark index: Carnegie Small Cap Return Index Sweden.

The diagram shows the historical development in Swedish krona.

The return for all the years is calculated with a deduction for the ongoing charges and with dividends reinvested in the Fund. Inflation is not taken into account.

Previous years' results are no guarantee of future performance.

Fund launched 2020-10-08.
