

Verdipapirfondet Holberg Norge, share class A

The Fund is managed by Holberg Fondsforvaltning AS, an independent management company.

Objectives and Investment Policy

The Fund's objective is to provide the unit holders with the best possible long-term risk-adjusted return compared to the Fund's Norwegian investment universe.

Holberg Norge is an actively managed equity fund primarily investing in publicly listed Norwegian companies. A maximum of 10 % of the Fund's assets may be invested in unlisted companies.

The Fund has a concentrated portfolio where each company has a meaningful weight and thereby a disciplinary effect in the portfolio construction.

Holberg Norge is suitable for investors with more than a five-year investment horizon. Subscription and redemption of units can normally be carried out on all Norwegian business days. The minimum initial subscription amount is NOK 1000 and NOK 300 for monthly saving-plans.

Risk and Reward Profile

The Fund invests in the stock market, which in general are characterized by higher risk as well as the potential for higher returns. The Fund's investment strategy affects the Fund's risk and expected return. There is risk associated with investment in the Fund as a result of market fluctuations, changes in liquidity of the Fund's underlying investments, changes in exchange rates, interest levels, general economic conditions, and specific sector and corporate circumstances. The risk indicator does not necessarily take devaluations, political intervention and sudden fluctuations in the stock market into account.

Past Performance

Historical returns are no guarantee for future returns. Future returns will depend on market developments, the fund manager's skill, the Fund's risk profile, management fees and other costs. The return may become negative as a result of negative price developments. The return may vary considerably over the course of a year. Gains or losses for each unit holder will therefore depend on the exact timing of the subscription and redemption of units together with entry/exit charges.

All return figures are in NOK after deducting all costs that are charged to the Fund. Possible entry and/or exit charges for each unit holder are not included in the returns.
